profession     Handbook of Digital Forensics of Multimedia Data and Devices, Enhanced E-Book Anthony T. S. Ho, Shujun Li, 2016-05-20 Digital forensics and multimedia forensics are rapidly growing disciplines whereby electronic information is extracted and interpreted for use in a court of law. These two fields are finding increasing importance in law enforcement and the investigation of cybercrime as the ubiquity of personal computing and the internet becomes ever more apparent. Digital forensics involves investigating computer systems and digital artefacts in general while multimedia forensics is a sub topic of digital forensics focusing on evidence extracted from both normal computer systems and special multimedia devices such as digital cameras. This book focuses on the interface between digital forensics and multimedia forensics bringing two closely related fields of forensic expertise together to identify and understand the current state of the art in digital forensic investigation. Both fields are expertly attended to by contributions from researchers and forensic practitioners specializing in diverse topics such as forensic authentication, forensic triage, forensic photogrammetry, biometric forensics, multimedia device identification and image forgery detection among many others. Key features: Brings digital and multimedia forensics together with contributions from academia, law enforcement and the digital forensics industry for extensive coverage of all the major aspects of digital forensics of multimedia data and devices. Provides comprehensive and authoritative coverage of digital forensics of multimedia data and devices. Offers not only explanations of techniques but also real world and simulated case studies to illustrate how digital and multimedia forensics techniques work. Includes a companion website hosting continually updated supplementary materials ranging from extended and updated coverage of standards to best practice guides, test datasets and more case studies.     *ECCWS 2021 20th European Conference on Cyber Warfare and Security* Dr Thaddeus Eze, 2021-06-24 *Conferences Proceedings of 20th European Conference on Cyber Warfare and Security*     Corruption in the Public Sector Krishna K. Tummala, 2021-03-08 This edited collection examines corruption in the public sector assessing case studies from across the world to provide an international perspective on this global issue. Providing a broad overview of public sector corruption including local and national perspectives, this volume will appeal to scholars of public policy and corruption worldwide.     **Cyber Crime** Nash Haynes, 2018-11-07 Cyber Crime is an evil having its origin in the growing dependence on computers in modern life. In a day and age when everything from microwave ovens and refrigerators to nuclear power plants is being run on computers, Cyber Crime has assumed rather sinister implications. Cyber Crime poses great challenges for law enforcement and for society in general. To understand why this is true it is necessary to understand why and how cybercrime differs from traditional terrestrial crime. Net crime refers to criminal use of the Internet. Cyber crimes are essentially a combination of these two elements and can be best defined as e Offences that are committed against individuals or groups of individuals with a criminal motive to intentionally harm the reputation of the victim or cause physical or mental harm to the victim directly or indirectly using modern telecommunication networks such as the Internet, Chat rooms, e mails, notice boards and groups and mobile phones, SMS, MMS, etc. Since Cyber Crime is a newly specialized field

growing in cyber laws there is absolutely no comprehensive law on Cyber Crime anywhere in the world This is precisely the reason why investigating agencies are finding cyberspace to be an extremely difficult terrain to handle This book explores technical legal and social issues related to Cyber Crime Cyber Crime is a broad term that includes offences where a computer may be the target crimes where a computer may be a tool used in the commission of an existing offence and crimes where a computer may play a subsidiary role such as offering evidence for the commission of an offence
