Construction Management 4th Edition:

Construction Management Daniel W. Halpin, Bolivar A. Senior, Gunnar Lucko, 2017-08-07 It is often said that the construction professional has to be a jack of all trades and master of all. This text covers a wide range of subjects reflecting the breadth of knowledge needed to understand the dynamics of this large and complex industry. This edition includes updated chapters on planning and scheduling, a new chapter addressing linear scheduling methods, material regarding the historical background of construction as a profession, and includes an Instructor Resource of solutions to the end of chapter review exercises. This text has become a standard course text at many universities. The first four editions have enjoyed wide success as an introductory treatment of the subjects which are critical to success in the construction industry. This fifth edition preserves the features that have been most appreciated by its users throughout the years and adds suggestions provided by instructors and students through formal surveys and informal feedback to the authors. **Construction Planning and Scheduling** Jimmie Hinze, 2008 Offering broad coverage of all major scheduling subjects, this book is a comprehensive resource designed for construction management planning and scheduling. It follows a logical progression introducing precedence diagramming early and following with chapters on activity durations, resource allocations, network schedules, and more. It reflects current trends in scheduling: short interval scheduling, computer scheduling, linear scheduling, etc., and includes chapters on arrow diagramming and PERT. With an eye on application, it includes a unique discussion of contract provisions related to scheduling and incorporates a sample project throughout.
