### **The Underrepresentation of Women in Science: International and Cross-Disciplinary Evidence and Debate**

Stephen J. Ceci, Wendy M. Williams, Shulamit Kahn, 2018-04-20 There is no shortage of articles and books exploring women's underrepresentation in science. Everyone is interested: academics, politicians, parents, high school girls and boys, women in search of college majors, administrators working to accommodate women's educational interests. The list goes on. But one thing often missing is an evidence-based examination of the problem, uninfluenced by personal opinions, accounts of lived experiences, anecdotes, and the always encroaching inputs of popular culture. This is why this special issue of *Frontiers in Psychology* can make a difference. In it, a diverse group of authors and researchers with even more diverse viewpoints find themselves united by their empirical, objective approaches to understanding women's underrepresentation in science today. The questions considered within this special issue span academic disciplines, methods, levels of analysis, and nature of analysis. What these articles share is their scholarly, evidence-based approach to understanding a key issue of our time.

*Enriching Teaching and Learning Environments With Contemporary Technologies* Durnali, Mehmet, Limon, Ibrahim, 2020-02-07 Educational technologies have revolutionized the learning and teaching environments. Offline, online applications, and social media have changed the conventional learning and teaching habits and competencies. In terms of learners, it has been empirically proven that the use of educational technologies in the classroom makes learning easier and more enjoyable. On the other hand, it also poses threats to students, such as cyberbullying and online addiction. While exploiting the opportunities of technological use in the classroom, educators must also remain vigilant and formulate ways to overcome the challenges and risks brought by technology. *Enriching Teaching and Learning Environments With Contemporary Technologies* is an essential research publication that aims to present exemplary practices of technology use and their management in pedagogical purposes in learning and teaching environments. The book also analyzes problems that may arise and develops policies on educational technologies and the exploitation of technology with pedagogical purposes as part of the discussion to solve these challenges. Featuring a wide range of topics such as augmented reality, mass media, and religious education, this book is ideal for educators who want to use technology in class, educational administrators who have responsibilities for developing policies on educational technologies and managing the use of them, and researchers who want to carry out a deep investigation into the subject. Additionally, educational software developers, academicians, instructional designers, curriculum developers, education professionals, and students will also benefit from the research contained within the book.

**Treaty Implementation** Office of the Treaty Commissioner (Canada), 2007 The objective of this report is to assist the Parties in setting the foundation for a revitalized treaty relationship which will lead to treaty implementation in a modern context, thereby honouring the solemnity and sacred underpinnings of the treaties.
