Saxena, 2005 In plants the ability to regenerate identical individuals from single cells is the basis for modern agriculture These scientific advancements have given us virus free stocks novel germplasms clonal propagation systems and the commercial introduction of difficult to propagate plant species The timescale for breeding programs was dramatically reduced as plant tissue culture technologies were developed to shorten the time between generations and reduce the number of generations required for a line to be developed Without the capacity to regenerate plants it would not have been possible for plant biotechnology and genetic engineering to have advanced this far This book contains detailed reviews by the leading scientists who made these discoveries The Journal of the Indian Botanical Society Indian Botanical Society, 2003 *Plant Molecules* Antonio Tiezzi, Annalisa Santucci, 2006 The New Volumes of the Encyclopædia Britannica, 1902 *Book Review Index*, 2003 Vols 8 10 of the 1965 1984 master cumulation
