Database Automation Using Vba Ucb Access:

Automating Microsoft Access with VBA Mike Gunderloy, Susan Sales Harkins, 2004-09-14 This is the eBook version of the printed book. If the print book includes a CD ROM this content is not included within the eBook version. If you use Microsoft Access in your every day business life but haven't learned to fully exploit the program now's your chance. Automating Microsoft Access with VBA is a thorough introduction to programming Microsoft Access using Visual Basic for Applications VBA. With this book you will gain a working knowledge of VBA and be able to customize your Microsoft Access databases. You will cover topics that include Operators and functions, Debugging and error handling, Menu commands, Forms and reports, Jet databases, DAO object model. Save money by learning to use VBA to customize your databases instead of paying someone else to do it for you.

Microsoft Office Access 2007 VBA Scott B. Diamond, Brent Spaulding, 2008 Business Solutions Microsoft R Office Access 2007 VBA Develop your Access 2007 VBA expertise instantly with proven techniques. Microsoft Office Access 2007 VBA builds on the skills you've already developed in creating database applications and helps you take them to the next level using Visual Basic for Applications VBA to accomplish things you once performed manually. To facilitate this lofty goal Access includes the VBA programming language. Even if you've never programmed this book will help you learn how to leverage the power of VBA to make your work with Access more efficient than ever before. Microsoft Office Access 2007 VBA is for professionals who use Microsoft Access frequently in their daily work. You have serious work to get done and you can't spend all day reading a computer book. This book teaches you the essential skills you need to automate your databases as quickly as possible. Although written for Access 2007 the techniques and concepts covered will work in most versions of Microsoft Access.

Highlights of This Book Include: Navigating within the Visual Basic Editor, Using variables, constants and data types, Employing built-in functions, Creating procedures, Understanding object and event driven coding, Working with arrays, Understanding scope, Working with forms, Using selection controls, Creating reports, Exploring menus, navigation and ribbons, Using object models, Working with data, Defining database schema, Using the Windows API, Working with XML files, Exploring Access SQL.
