1. Find a parametrized curve $\alpha(t)$ whose trace is the circle $x^2 + y^2 = 1$ such that $\alpha(t)$ runs <u>clockwise</u> around the circle with $\alpha(0) = (0, 1)$.

(1,0)

General version (what we know since All
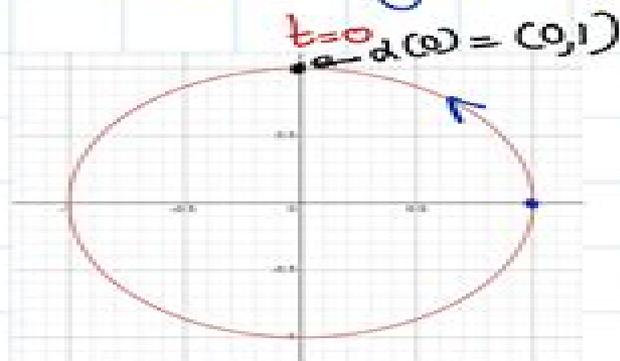

$$\alpha : [0, 2\pi] \longrightarrow \mathbb{R}^2$$

$$t \longmapsto (\cos(t), \sin(t))$$

$$t=0 \longrightarrow (1,0)$$

$$t = \pi/2 \longrightarrow$$

$$t=$$

Now Let's go back to the Problem

$t=0$ $\alpha(0) = (0,1)$

$$\alpha : [0, 2\pi) \longrightarrow \mathbb{R}^2$$
$$\alpha(t) = (\cos(\theta), \sin(-\theta))$$
$$\alpha(0) = (\cos(0), \sin(0))$$
$$= (1, 0)$$

This wrong. we have change intial condition. So define as follows

   Advanced Mathematics for the Modeling and Solution of Challenging Problems in Engineering Oscar Castillo,Gökhan Çuvalcıoğlu,Feride Tuğrul,2025-06-01 This book includes studies that give mathematical solution methods and mathematical modeling to support these methods for solving problems in the current application area of engineering as well as studies that include solutions for problems that are also related to current life areas In this book some current problems in the field of mathematics and engineering solutions to solve these problems and existing engineering methods for these problems are included Basically machinery chemistry electronics computers construction environment etc studies in both the application and theoretical fields of mathematics are needed to solve optimization modeling encryption methods and thermal problems that are currently encountered in engineering fields In this book some current problems are presented and related theoretical and applied mathematical studies are included   **Nonlinear Diffusion Equations and Their Equilibrium States, 3** N.G Lloyd,M.G. Ni,L.A. Peletier,J. Serrin,2012-12-06 Nonlinear diffusion equations have held a prominent place in the theory of partial differential equations both for the challenging and deep math ematical questions posed by such equations and the important role they play in many areas of science and technology Examples of current inter est are biological and chemical pattern formation semiconductor design environmental problems such as solute transport in groundwater flow phase transitions and combustion theory Central to the theory is the equation Ut cp U f u Here denotes the n dimensional Laplacian cp and f are given functions and the solution is defined on some domain n x 0 T in space time FUn damental questions concern the existence uniqueness and regularity of so lutions the existence of interfaces or free boundaries the question as to whether or not the solution can be continued for all time the asymptotic behavior both in time and space and the development of singularities for instance when the solution ceases to exist after finite time either through extinction or through blow up   *Differential Geometry* H. Blaine Lawson,Keti Tenenblat,1991   *Global Analysis of Minimal Surfaces* Ulrich Dierkes,Stefan Hildebrandt,Anthony Tromba,2010-08-16 Many properties of minimal surfaces are of a global nature and this is already true for the results treated in the first two volumes of the treatise Part I of the present book can be viewed as an extension of these results For instance the first two chapters deal with existence regularity and uniqueness theorems for minimal surfaces with partially free boundaries Here one of the main features is the possibility of edge crawling along free parts of the boundary The third chapter deals with a priori estimates for minimal surfaces in higher dimensions and for minimizers of singular integrals related to the area functional In particular far reaching Bernstein theorems are derived The second part of the book contains what one might justly call a global theory of minimal surfaces as envisioned by Smale First the Douglas problem is treated anew by using Teichm ller theory Secondly various index theorems for minimal theorems are derived and their consequences for the space of solutions to Plateau s problem are discussed Finally a topological approach to minimal surfaces via Fredholm vector fields in the spirit of Smale is presented
