## **Digital Success In English:**

**Teaching English and Literature in the Digital Era** Yashar Kareem Sharrad Algburi, 2025-11-30 Teaching English and Literature in the Digital Era by Yashar Kareem Sharrad Algburi is a comprehensive guide that examines the profound paradigm shift in language education brought about by digital technology. The book contends that technology is no longer a supplementary aid but a transformative force that reshapes teaching and learning, enabling more dynamic, student-centered and interactive classrooms. Across thirteen well-structured chapters, it maps this evolving landscape, beginning with foundational perspectives on the digital shift and innovative pedagogical models such as project-based and integrated learning. It then explores practical applications including learning software, social media, and gamification, while addressing the challenges of digital and hybrid modalities and assessment practices. The book also engages with real-world implementation issues, ethical considerations, the digital divide, and the imperative of teacher training, before concluding with future trends and the collaborative roles of educators and learners in sustaining innovation. Combining theoretical insight with practical guidance, the work seeks to empower educators to leverage technology effectively, fostering inclusive and engaging learning environments that equip students for a globally connected digital world.

**Informal Digital Learning of English** Ju Seong Lee, 2021-12-27 In today's digital era, increasing numbers of youth around the world learn English outside classrooms frequently with the use of technology. This timely book brings together research and theory on the increasingly common phenomenon of Informal Digital Learning of English (IDLE) among students of all ages and across a wide range of contexts globally. By examining the positive impact of IDLE on students' reading, writing, listening, and speaking abilities, as well as the unique challenges that result, Lee synthesizes research in one accessible and comprehensive volume in this rapidly developing domain. This book addresses key concepts including Computer Assisted Language Learning, the impact on standardized assessment, and the role of classroom learning. Lee offers empirically tested activities, pedagogical recommendations, and lesson plans to engage ESL/EFL students. The research overview and practical offerings make this an ideal text for courses in TESOL, online education, language teaching, online digital learning, community and language, and applied linguistics.

ELT in Asia in the Digital Era: Global Citizenship and Identity Suwarsih Madya, Fuad Hamied, Willy A. Renandya, Christine Coombe, Yazid Basthomi, 2018-06-27 This proceedings book captures a wide range of timely themes for readers to be able to foresee the digital era's impact on English teaching in non-English speaking countries. English used in the global environment, the frequent mobile communication, and the use of AI-based translators are bringing about dramatic changes in our English language learning and teaching. Who can provide us the wisdom to know what to do? Those scholars going through these complex environmental changes. A collection of puzzle pieces may bring us a better contour for the future than a perfectly edited book. It's indeed a pleasure reading these insightful pieces to gain wisdom for the future of ELT practices in global contexts.
