## **Destined For Equality:**

*Destined for Equality* Robert Max Jackson,1998-10 Men and women remain unequal in the United States but in this provocative book Robert Max Jackson demonstrates that gender inequality is irrevocably crumbling *Destined for Equality* the first integrated analysis of gender inequality s modern decline tells the story of that progressive movement toward equality over the past two centuries in America showing that women s status has risen consistently and continuously Jackson asserts that women s rising status has been due largely to the emergence of modern political and economic organizations which have transformed institutional priorities concerning gender Although individual politicians and businessmen generally believed women should remain in their traditional roles Jackson shows that it was simply not in the interests of modern enterprise and government to foster inequality The search for profits votes organizational rationality and stability all favored a gender neutral approach that improved women s status The inherent gender impartiality of organizational interests won out over the prejudiced preferences of the men who ran them As economic power migrated into large scale organizations inherently indifferent to gender distinctions the patriarchal model lost its social and cultural sway and women s continual efforts to rise in the world became steadily more successful Total gender equality will eventually prevail the only questions remaining are what it will look like and how and when it will arrive The Americana ,1923 The Encyclopedia Americana ,1922

Olsen,2016 Supper at Emmaus traces various important intellectual topics from the ancient world to the modern period Generally as in its treatment of the

question of whether the long standing contrast between cyclical and linear views of history is helpful it introduces important thinkers who have considered the question A preoccupation of the book is the appearance and reappearance across the centuries of patterns used to organize temporal and cultural experience After an opening essay on transcendental truth and cultural relativism the second chapter traces a distinction common in historical writings during the past two centuries between an alleged ancient classical cyclic view of time and history used to describe the claimed repetitiveness of and similarities between historical events nothing is new under the sun and a contrasting Jewish Christian linear view sometimes described as providential in that it moves through a series of unique events to some end intended by God In the latter history is about something the education of the human race or the redemption of humankind As in each of the remaining essays the book then attempts to draw out the limitations of what the current consensus on this topic has become It does this for such things as our current understanding of religious toleration humanism natural law and teleology Some of the essays such as those on debate about Augustine s understanding of marriage or the concluding illustrated essay on the baroque city of Lecce are published for the first time Others are based on previously published contributions to the scholarly literature though generally each of these chapters concludes with a postscript that engages with current scholarly debate on the subject
