percentage in history The answer is simple because our culture teaches women to fear birth as a painful and unsettling experience Fear causes three physical reactions in the body tightening of the muscles reduced blood flow to the birthing muscles and the release of certain hormones which increase the pain and discomfort of childbirth This is not hocus pocus this is science

pharmaceutical drugs Women using hypnobirthing report needing little or no pain relief during labour and their babies are born calm and alert Mothers need less medical intervention and if they do they report feeling much more able to deal with it Calm and confident parents are empowered to make informed decisions about their care which can contribute enormously to a positive birth experience In Why Hypnobirthing Matters Katrina Berry looks at the origins and rationale for using hypnosis for childbirth explains what you can expect from hypnobirthing and dispels common misunderstandings in a lively informative way
