Flying in the Face of Criminalization Andreas Mateou, Sofia Mateou, 2026-03-31 *Flying in the Face of Criminalization* examines the critical intersection between aviation safety investigations and criminal proceedings This comprehensive analysis reveals how the legal system s punitive approach often conflicts with aviation s core objective of learning from mistakes to enhance safety The new edition significantly expands coverage through 2025 documenting the increase in litigation against aviation professionals and organizations following accidents and serious incidents It provides crucial insights into recent developments in corporate criminal liability manslaughter charges and corporate homicide cases that have transformed accountability standards across the industry With an unparalleled collection of cases from January 2010 to June 2025 with updates to the Boeing 737 MAX and AF 447 litigation until 30 November 2025 the book explores how varying legal systems worldwide apply liability principles inconsistently and create uncertainty for aviation professionals operating across jurisdictions A diverse audience will benefit from this book including legal professionals aviation consultants pilots air traffic controllers safety officers airline managers and accident investigators *Federal Register* ,2013-12 *Structural Health Monitoring of Aerospace Composites* Victor Giurgiutiu, 2015-09-08 *Structural Health Monitoring of Aerospace Composite Structures* offers a comprehensive review of established and promising technologies under development in the emerging area of structural health monitoring SHM of aerospace composite structures Beginning with a description of the different types of composite damage which differ fundamentally from the damage states encountered in metallic airframes the book moves on to describe the SHM methods and sensors currently under consideration before considering application examples related to specific composites SHM sensors and detection methods Expert author Victor Giurgiutiu closes with a valuable discussion of the advantages and limitations of various sensors and methods helping you to make informed choices in your structure research and development The first comprehensive review of one of the most ardent research areas in aerospace structures providing breadth and detail to bring engineers and researchers up to speed on this rapidly developing field Covers the main classes of SHM sensors including fiber optic sensors piezoelectric wafer active sensors electrical properties sensors and conventional resistance strain gauges and considers their applications and limitation Includes details of active approaches including acousto ultrasonics vibration frequency transfer function guided wave tomography phased arrays and electrochemical impedance spectroscopy ECIS among other emerging methods *Stress, Vibration, and Wave Analysis in Aerospace Composites* Victor Giurgiutiu, 2022-06-16 *Stress Vibration and Wave Analysis in Aerospace Composites* SHM and NDE Applications presents a unified approach to studying and understanding stress vibrations and waves in composite materials used in aerospace applications Combining topics that are typically found across an array of various sources the book starts by looking at the properties of various composite materials progresses to coverage of an analysis of stress vibration and waves and then concludes with a discussion of various structural health monitoring SHM and

nondestructive evaluation NDE techniques and applications based on the analysis developed earlier in the book Every chapter of the book contains a variety of worked out examples to illustrate and tie together underlying theory and specific applications The MATLAB code used to generate these examples is available on the book s companion website as are solution documents and additional MATLAB code for problems and exercises featured in each chapter Presents a comprehensive treatment of aerospace composites starting with composite material properties and then covering an analysis of stress vibration and waves and culminating with SHM and NDE applications Provides an understanding of the use and application of stress vibration and waves to detect composite damage and monitor growth Features an array of worked out examples problems and exercises Includes access to a companion website that features MATLAB codes for worked out examples along with problems exercises and their solutions
