Proceedings of the Third World Conference on Floating Solutions Tomoki Ikoma, Shigeru Tabeta, Soon Heng Lim, Chien Ming Wang, 2024-06-29 This book includes peer reviewed articles from the Third World Conference on Floating Solutions WCFS 2023 Japan with an aim to pioneer the SDGs and Next SDGs by making the most use of oceans and water In recent years the safety and security of people s lives around the world have been threatened by frequent floods and rising sea levels attributable to climate change The COP 26 has set a common global goal of limiting the temperature rise to 1.5 degrees Celsius above pre industrial levels It is an urgent task to cope with climate change as well as to utilize decarbonized and renewable energy The UN is promoting the SDGs which aim to achieve 17 Goals between 2015 and 2030 However efforts to reach the Goals will not end in 2030 but will be an ongoing challenge for humanity beyond 2030 Here we tentatively call the Goals to be achieved after the SDGs as Next SDGs Ocean and water have the potential to provide solutions to the disasters such as flooding and sea level rise due to

climate change In this context WCFS 2023 presents ocean and water as the urban infrastructure and explores new technology and feasible solutions In particular it is necessary to consider urban planning marine architecture port planning connecting land and sea disaster prevention renewable energy and food production on the sea and water Further it is indispensable that knowledge experience dream and strong desire to realize these challenges are supported by a diversity of people

**The Revenge of Gaia** James Lovelock,2007-08-02 In The Revenge of Gaia bestselling author James Lovelock father of climate studies and originator of the influential Gaia theory which views the entire earth as a living meta organism provides a definitive look at our imminent global crisis In this disturbing new book Lovelock guides us toward a hard reality soon we may not be able to alter the oncoming climate crisis Lovelock s influential Gaia theory one of the building blocks of modern climate science conceives of the Earth including the atmosphere oceans biosphere and upper layers of rock as a single living super organism regulating its internal environment much as an animal regulates its body temperature and chemical balance But now says Lovelock that organism is sick It is running a fever born of the combination of a sun whose intensity is slowly growing over millions of years and an atmosphere whose greenhouse gases have recently spiked due to human activity Earth will adjust to these stresses but on time scales measured in the hundreds of millennia It is already too late Lovelock says to prevent the global climate from flipping into an entirely new equilibrium state that will leave the tropics uninhabitable and force migration to the poles The Revenge of Gaia explains the stress the planetary system is under and how humans are contributing to it what the consequences will be and what humanity must do to rescue itself
