A Philosophy of Landscape Construction Bruce Ferguson, 2020-12-30 A Philosophy of Landscape Construction outlines a philosophy of values in landscape construction demonstrating how integral structures such as pavements and walls constitute a key element to how people interact with and inhabit the final design The book discusses how these structures enable assist and care for people negotiating between the dynamic processes of site ecosystems and the soil on which they are founded They articulate spatial functional cultural and ecological meanings Within this theoretical framework designers will learn to recognize and insert a set of core values into the most technical design stages to reach their full potential By offering a new perspective on landscape construction moving away from the exclusively technical characteristics this book allows landscape architects to realise the ideal vision for their designs It is abundantly illustrated with examples from which designers can learn both successes and failures and will be an essential companion to any study of built landscapes **The**

^APolitics of Individualism Christopher F. Karpowitz, Kelly D. Patterson, 2025-09-19 The Politics of Individualism demonstrates how individualist attitudes drastically reduce the possibility that people will defer to the decisions and practices of civic and political institutions therefore threatening the stability of democratic society Modern American justifications for individual decisions are often rooted in skepticism toward authority and the influence of social institutions Examining this moral dimension of individualism political scientists Christopher F Karpowitz and Kelly D Patterson argue that attachment to this form of the individualist attitude poses significant risks to the maintenance of democratic practices and institutions Green Grades Graham Bullock, 2017-08-25 A comprehensive assessment and analysis of the validity

trustworthiness and effectiveness of such environmental ratings as ENERGY STAR LEED and USDA Organic Consumers are confronted with a confusing array of environmental ratings on products that range from refrigerators to shampoos Is the information that these ratings represent trustworthy accurate or even relevant to environmental concerns Information optimists believe that these green grades can play an important role in saving the planet Information pessimists consider them a distraction from pursuing legislative and regulatory actions In this book Graham Bullock offers a comprehensive assessment and analysis of the effectiveness and validity of such environmental ratings as ENERGY STAR USDA Organic the Forest Stewardship Council LEED and the Toxic 100 Air Polluters Index Bullock stakes out a position as an information realist acknowledging both the contributions and the limitations of these initiatives Drawing on interviews case studies and an original dataset of 245 environmental ratings and certifications he examines what he calls the information value chain of green grades organizational associations content methods interfaces and outcomes He explores the relevance of the information to the issues the legitimacy and accountability of sponsoring or cooperating organizations the reliability of methods used to develop the information the prominence and intelligibility of communication to the public and the effects and effectiveness of the information after it emerges from the value chain Bullock s analysis offers a realistic appraisal of the
