Handbook of Intercultural Training
Dan Landis, Richard W. Brislin, 2013-10-22 Handbook of Intercultural Training Volume II Issues in Training Methodology is a major attempt to describe critique and summarize the major known ways to provide cross cultural training The collection of essays discusses the stresses of intercultural encounter as well as how to reduce these This volume is divided in two parts The first part discusses context factors including stress factors in intercultural relations and aspects of organization effectiveness A cross cultural experience from the perspective of a program manager is presented as well as a situational analysis and designing a translator based training program where alternative designs are forwarded for trainers to use effectively in multicultural and multilingual environments The second part presents different methods of training Learning from sojourners and from individuals from various cultures results in different frameworks for interpreting cross cultural interactions Consultants advisors and experts may find themselves performing outside and beyond their home ground and social groups so training programs pertaining to their particular situation need to be addressed more profoundly The training program in race relations by the U S Department of Defense is reviewed and the effects of stereotyping people are discussed and considered as other factors in the preparation of training programs English is then examined as a tool for intercultural communication where aspects of intercultural training should be integrated This book is suitable for overseas workers foreign students foreign technical advisers diplomats immigrants and many others who are going to live and work and be

exposed to other cultures

Communicating Beyond Language Betsy Rymes, 2014-01-03 This new book offers a timely and lively appraisal of the concept of communicative repertoires resources we use to express who we are when in dialogue with others Each chapter describes and illustrates the communicative resources humans deploy daily but rarely think about not only the multiple languages we use but how we dress or gesture how we greet each other or tell stories the nicknames we coin and the mass media references we make and how these resources combine in infinitely varied performances of identity Rymes also discusses how our repertoires shift and grow over the course of a lifetime as well how a repertoire perspective can lead to a rethinking of cultural diversity and human interaction from categorizing people's differences to understanding how our repertoires can expand and overlap with other thereby helping us to find common ground and communicate in increasingly multicultural schools workplaces markets and social spheres Rymes affirms the importance of the communicative repertoires concept with highly engaging discussions and contemporary examples from mass media popular culture and everyday life The result is a fresh and exciting work that will resonate with students and scholars in sociolinguistics intercultural communication applied linguistics and education

Culture as the Core Dale L. Lange, 2000-09-05 This volume addresses integrating culture into second language classrooms featuring chapters from symposia and conferences at the University of Minnesota It combines theoretical discussions with practical applications aiming to refine and translate cultural learning theories into classroom practice
