

## Biology Exam 1 Study Guide

### Lecture 1 – Introduction to Biological Science

#### Tree of Life

- Domains
  - Eukarya → visible life
    - Split into animals and plants
    - Very small position
  - Bacteria → single cell
    - Make up most of life's branches
    - Symbionts that evolved into mitochondria and chloroplasts were eubacteria
  - Archaea → original domain of life
    - More closely related to eukaryotes than eubacteria, first branch of life
    - Basic split between archaea and bacteria
- Candidate phyla radiation: Single species have been identified, each identifies an entire phylum which is yet to be understood - pioneer species (tree is dominated by new species that scientists have never seen before)
- Species disappearing faster than can be recovered
- Eukaryotes and archaea are most closely related branches

#### Destruction and Mass Extinction

- One million species face imminent extinction because of humans
- Recent past → >50% vertebrates/> 75% flying insects lost in the past <50 years
- Critically threatened → >40% amphibians, >30% plants/corals/sharks, >25% mammals
- Populations and extinctions have increased

#### Theory of Evolution

- Evolution: all life on earth evolved from a common ancestor, most properties within cells work in the same way, the change in gene distribution over time within a population
- Theory: a very well substantiated idea that explains many overlapping phenomena at once. wide-ranging, strongest. Not a hypothesis
- Darwin: species arise through random mutation and natural selection for fitness
- Evidence (fewer than 40% of Americans believe in evolution)
  - fossil record shows conservation of homologous structures
  - Molecular proof: same DNA and RNA protein in cells
  - Homologous function in hands and fins → evolved similar mechanisms in appendages
- Scopes Monkey Trial
  - Scopes taught evolution illegally: resulted in Butler Act → forbid teaching evolution in TN
- Endosymbiont theory
  - Single composite cell of greater complexity could evolve from two or more separate simpler living cells in a symbiotic relationship

#### Year of Earth's History

- 1 Jan: earth formed 4.54 bya by acceleration of material from the solar nebula via gravitational collapse, conditions were incompatible with life, bombarded with asteroid-sized meteors for 800 million years
- 4 Mar: by 3.8 bya bombardment had slowed, Earth had cooled to lower the temps "compatible" with life

Department of the Army,1951 All Hands ,1968 *Monthly Catalog of United States Government Publications* ,1963 Biology Facts and Principles 1 (Speedy Study Guides) Speedy Publishing LLC,2015-01-23 A biology study guide that outlines the basic facts and principles can help students study in many ways Often times students get overwhelmed in so much detail that they forget the basics Study guides can help students learn basic terminology and concepts that will then help them build a higher knowledge Condensing knowledge into a one page sheet can help reinforce the most important points and can be used for a quick review reference as well *Catalog of Copyright Entries. actual exam And sometimes the answers given for some questions on some practice exams are just plain wrong This study guide may not be for everyone but I think there s a good chance it ll help you convince yourself that you really do understand the material Medical College Admissions Test MCAT and MCAT2015 are registered trademarks of the Association of American Medical Colleges which neither sponsors nor endorses this product I took the MCAT way back in the middle of the 1980s and I did very well if I do say so myself **The Annual American Catalog, 1908** ,1909 Documents Accompanying the Journal of the House of Representatives Michigan,1893 *The United States Catalog* ,1921 **Books of 1912-** Chicago Public Library,1912
