Lischka,Wendy B. Sanchez,2017-09-27 This book features contributions from over 40 mathematics teacher educators exploring how theoretical perspectives shape goals and activities for teaching PreK 12 methods It reflects on diverse experiences serving as a resource for MTEs to improve their practices through scholarly inquiry **Early Childhood Curriculum Resource Handbook** ,1993 *Resources in Education* ,1977 **Theoretical Nursing** Afaf Ibrahim Meleis,2011 An additional assumption was that the processes for theory development were new to nursing and hence nurses in graduate programs learned strategies for advancing knowledge from other disciplines This assumption was debunked with the knowledge that nurses were always engaged in knowledge development driven by their experiences in clinical practice Because of these assumptions most of the early writing about theory development was about outlining strategies that should be used rather than strategies that have already been used in the discipline to develop theories Theorists themselves did not uncover or adequately discuss ways by which they developed their theories therefore the tendency was to describe processes that were based on theories developed in other disciplines mainly the physical and social sciences And an implicit assumption was made that there should be a single strategy for theory development some claiming to begin the process from practice and others believing it should be driven by research Provided by publisher **Chinese Heritage Sites and their Audiences** Rouran Zhang,2020-03-17 Chinese Heritage Sites and their Audiences provides a Chinese perspective on tourists relationship to heritage Contributing to ongoing debates within heritage and tourism studies the book offers insights into how and why visitors engage with such sites Drawing on interviews with domestic tourists local residents and heritage officials at the World Heritage sites of West Lake Xidi and Hongcun Zhang argues that tourists have agency when they visit heritage sites they are doing cultural social and emotional work whilst also negotiating cultural meanings Providing an examination of the complex interactions between locals and tourists the author then considers how tourists navigate and interpret heritage sites Finally Zhang examines whether the government or locally controlled tourism enterprises are more effective in facilitating meaningful cultural interaction between tourists and locals Overall the book demonstrates the interrelation between tourism and heritage and the tensions that are created when the ways in which sites are used differ from the expectations of UNESCO and national or

regional site managers Chinese Heritage Sites and their Audiences pays particular attention to ongoing debates about heritage performances the importance of emotions and the agency of tourists and will thus appeal to academics and students engaged in the study of heritage tourism landscape architecture and anthropology
