

Wave Recognition

A pair of pattern-recognition cards is used orally. The sequence combinations they pass through (including and excluding the observed) patterns. Individual combinations are given. Students produce the corresponding combinations. Make a similar recognition for different patterns that will produce. Use the same sets of patterns. They are identified & distinguished.

The grid consists of 10 rows of pattern-recognition cards. Each row contains two cards. The patterns are combinations of three wave types: a square wave, a triangular wave, and a circular wave. The cards are arranged in a 10x2 grid. A legend on the right side of the grid shows the three wave types with their corresponding symbols: a square wave with a square, a triangular wave with a triangle, and a circular wave with a circle. The legend also includes the text "The wave is shown in the box."
