Cyber attacks perpetrated against businesses governments organizations and individuals have been occurring for decades. Many attacks are discovered only after the data has been exploited or sold on the criminal markets. From the perspective of the criminal the current state of inconsistent security policies and lax investigative procedures is a profitable and low risk opportunity for cyber attacks. They can cause immense harm to individuals or businesses online and make large sums of money safe in the knowledge that the victim will rarely report the matter to the police. For those tasked with probing such crimes in the field information on investigative methodology is scarce. The Cybercrime Investigators Handbook is an innovative guide that approaches cybercrime investigation from the field practitioner s perspective. While there are high quality manuals for conducting digital examinations on a device or network that has been hacked the Cybercrime Investigators Handbook is the first guide on how

security and as the Pennsylvania case showed individuals often society's most vulnerable. But we can watch and learn from cyber extortionists leaving us better prepared for next time. In 2022 a series of devastating ransomware attacks prompted Costa Rica's President to declare a national emergency describing a state of war.
