[You Can Take Better Pictures In One Hour - Cloudy Day Shooting You Can Take Better Pictures, #5](#) Robert Kerner, 2014-11-17 This book is about taking pictures on a cloudy day The light on a cloudy day is the best lighting conditions for taking pictures outdoors However you need to know how to use the conditions to your advantage This book will show you how to get the best pictures from the natural light and how to use a reflector or a flash to enhance the natural to get the best pictures possible Good pictures are only 10% from the camera but they are 90% about the person taking the picture This series of books gives you the 90% you need to get great pictures with this book about taking pictures on a cloudy day

The Complete Portrait Manual Jideon Francisco Marques, 2022-12-03 MEET YOUR DSLR There are tons of camera types on the market today from cheap point and shoots to mirrorless interchangeable lens ILC models from tiny action cams to the camera on your smartphone But for many dedicated shooters the obvious first choice in equipment is still a digital single lens reflex DSLR camera Why First DSLRs allow a shooter to frame pictures with precision fairly easily Second the sheer number of lens types available lets one camera perform many functions Like any new piece of equipment function and controls can take some getting used to Here s an overview of the main controls as well as a quick peak at what s going on inside the camera itself

MANUAL FOCUS RING Don t want your camera to decide where to focus Turn this ring Want to make fine manual focus adjustments while using autofocus Again turn this ring

ZOOM RING When your DSLR is fitted with a zoom lens use this ring to adjust for desired

focal length and determine how close or far away a subject in your shot appears

IMAGE STABILIZATION SWITCH Located on your lens or the body of your camera this switch kicks image stabilization on and off This function allows you to get sharper images of static objects without a tripod or in lower light than might be possible without it

HOTSHOE While it sounds like a dated dance move it s actually where you attach a flash or other accessory to your camera A lot of times DSLRs come with covers to shield the hotshoe when it s not in use

MODE DIAL Use this dial to pick a shooting mode Cede control of exposure settings to the camera in fully automatic mode be a control freak in fully manual or try one of the many preset program modes

ISO BUTTON This button controls the light sensitivity of your camera s image sensor If you re shooting in ultrabright light use a low ISO 50 200 and increase ISO in lower light FYI the higher the ISO in use the more noise visual distortion often in the form of grainy or blotchy appearance your image may have

AUTOFOCUS BUTTON Press this button to tell your DSLR to pick which elements in your shot should appear the sharpest

VIEWFINDER Peek through the viewfinder to make choices about how to compose and frame your shot Through it you ll see a corrected read right side up version of the image that reflects off your camera s reflex mirror

SHUTTER Essentially a mechanical curtain the shutter serves as a movable barrier between a camera s image sensor and its lens Open the shutter and your camera s reflex mirror pivots up allowing an image to hit the image sensor

PENTAPRISM Not unlike the brain s visual cortex the part of your brain that converts images your eyes see as upside down this pentagon shape prism flips an image out of reverse before sending it the viewfinder s way

IMAGE SENSOR A device covered with pixels light sensitive cells an image sensor measures the intensity and color of an image that has passed through the shutter Last the image sensor converts these measurements into digital form ultimately capturing your shot

REFLEX MIRROR When an image enters a lens it s upside down The reflex mirror reflects that image through a focusing screen in the direction of the pentaprism

LENS Detachable lenses change your camera s capabilities by narrowing or widening a circular opening the size of which is called the aperture to control the amount of light that enters Light passes through the lens on its way to the reflex mirror

[You Can Take Better Pictures In One Hour: Sunlight Shooting](#) Robert Kerner,2014-08-18 Cameras and direct sunlight do not work well together Direct sunlight is the hardest lighting situation to take pictures in because you have no control of it and very few options to try to modify it This book teaches and demonstrates how to get the best pictures possible shooting in direct sunlight on a sunny day The more you know about photography the better your pictures will be and the more you will enjoy photography You will quickly understand the concepts and learn the techniques without a lot of words to confuse you so you can go out and take some awesome photographs Page count was never a concern to me covering the concepts was I d rather have 30 very informative and useful pages than 300 pages of fluff An average reader should be able to get through this book in about an hour and see an instant improvement in the pictures they take You will not need to take out a loan for the tools I ll show you The most expensive tool I recommend is about 40 with most of them being far less than that down to a few pennies or free I wrote my

first photography ebook to fill the need for a short easy to understand basic photography guide In You Can Take Better Pictures In One Hour The Basics I covered the topics and concepts you need to know to take good pictures without all the confusing rhetoric that every book I had reviewed had in it It was about knowing your camera and using to the limits of its features Good photography is only 10 percent about the camera It is 90 percent about the person taking the pictures I continued to write books on how to take better pictures including posing people for pictures This is the first of the lighting topics with several more to come
