

Econ 101: Principles of Microeconomics

Class 1

- Scarcity refers to the society's resources.
- Economics is the study of the best way to use the scarce resources.
 - Examples could be things like how people decide how much to work save spend etc.
 - How firms decide how much to produce and how many workers to hire
 - how society decides to divide its precious resources, sacrifice one for another etc. (most optimal way to use scarce resources is the goal)
- Microeconomics is a branch of economics that studies people and firms make decisions to allocate limited resources, typically in markets where goods or services are being bought and sold.
- Consumer theory
Maximize utility (with limited income or time) this is using resources optimally.
- Producer theory
Maximize profit (with limited capital) Doing whatever they can to make as much money as they can.
- Mankiw's 10 principles 
 1. People Face tradeoffs
 - All decisions involve tradeoffs
 - Going to a party the night before a midterm leaves less time for studying.
 - Having more money to buy stuff requires working longer hours, which leaves less time for leisure.
 - Protecting the environment requires resources that might otherwise be used to produce consumer goods.
 - Efficiency vs equity
 2. Efficiency getting the most out of our scarce resources
 3. Equity distributing prosperity fairly among society's members.
 4. The cost of something is what you give up to get it.
 - Making decisions requires comparing the costs and benefits of alternative choices.
 - The opportunity cost of any item is whatever must be given up to obtain it.
 - the opportunity cost of going to college for a year is not just the tuition, books and fees but also the foregone wages. (wages you could have earned).
 - A person is rational if she systematically and purposefully does the best she can to achieve her objectives given the opportunity she has.
 - Many decisions are not all or nothing but involve marginal changes | incremental adjustments to an existing plan of action.
 5. Rational people often make decisions by comparing marginal benefits and marginal costs.
