Spatial Health Inequalities Esra Ozdenerol,2016-08-05 The neighborhoods and the biophysical political and cultural environments all play a key role in affecting health outcomes of individuals Unequal spatial distribution of resources such as clinics hospitals public transportation fresh food markets and schools could make some communities as a whole more vulnerable and less resilient to adverse health effects This somber reality suggests that it is rather the question of who you are depends upon where you are and the fact that health inequality is both a people and a place concern That is why health inequality needs to be investigated in a spatial setting to deepen our understanding of why and how some geographical areas experience poorer health than others This book introduces how spatial context shapes health inequalities Spatial Health Inequalities Adapting GIS Tools and Data Analysis demonstrates the spatial health inequalities in six most important topics in environmental and public health including food insecurity birth health outcomes infectious diseases children s lead poisoning chronic diseases and health care access These are the topics that the author has done extensive research on and provides a

detailed description of the topic from a global perspective Each chapter identifies relevant data and data sources discusses key literature on appropriate techniques and then illustrates with real data with mapping and GIS techniques This is a unique book for students geographers clinicians health and research professionals and community members interested in applying GIS and spatial analysis to the study of health inequalities Exploring the Utilization of Geographic Information Systems in Health Promotion and Public Health Candace I. J. Nykiforuk,2012 The purpose of this technical report is to identify and review how Geographic Information System GIS applications have been used in health related research e g policy development planning monitoring and surveillance The intention of this review is to generate a broader understanding of how GIS related methodological techniques and tools developed in other disciplines can be meaningfully applied to applications in health policy promotion and practice Page vii **GIS for Health and the Environment** Poh C. Lai,Ann S.H. Mak,2007-10-04 Aimed at all types of public health practitioners and theorists this book is a compilation of methodological and application developments in spatial epidemiological approaches for environmental and public health studies in the Asia Pacific region It aims to plug a gap in the literature that has seen a shortage of materials documenting the development of health GIS in this crucial part of the world
