Supply Chain Finance Wendy Tate, Lydia Bals, Lisa Ellram, 2018-12-03 Supply Chain Finance is a contributed book looking at the two major perspectives of managing finance across the supply chain. The first is more short term focused on accounts payables and receivables. The second is a more overarching perspective focused on working capital optimization in terms of inventory and asset management. It includes chapters from a variety of research perspectives as well as from business and policymakers. The authors look at the benefits of the supply chain finance approach including reduction of working capital, access to more funding at lower costs, risk reduction, as well as an increase of trust, commitment, and profitability through the chain. Supply Chain Finance includes theory as well as practical case studies addressing advances in the area of supply chain finance. The editors and contributors look at how to design and implement supply chain finance in supply chains and examine what the future holds for this important area. Online supporting resources include self-test, multiple choice, and essay questions for each chapter.

Building New Bridges Between Business and Society Hualiang Lu, René Schmidpeter, Nicholas Capaldi, Liangrong Zu, 2017-10-31 This book provides a comprehensive understanding of the linkages between business and society by addressing key issues in corporate social responsibility, CSR, sustainability, ethics, and governance. Thanks to the different visions and perspectives offered by a global group of authors with a broad range of expertise, the book offers a full spectrum of theoretical and practical approaches. Further, it combines the latest theoretical thinking with reviews of frameworks, cases, and best practices from various industries and nations. In particular, the book offers a historical perspective on the origins of CSR and discusses CSR in relation to sustainability and management with a special focus on CSR in Asia.

Work, Sleep, Repeat Felix Stein, 2020-07-12 Work Sleep Repeat is a fascinating account of the work regime of German management consultants. Examining one of the most sought after and secretive graduate professions, the book provides a first-hand account of the boardroom culture of Europe's strongest economy. Analyzing how knowledge and power operate in this sector, Felix Stein explores a number of paradoxes. For example, while it is the job of management consultants to analyse the activities of other employees, they actually spend most of their time in luxurious seclusion away from them. In addition, despite having a strong sense of the importance of their work, consultants often find it difficult to explain to outsiders what it is they do. The book addresses these and other paradoxes by arguing that consultants are engaged in abstract labour. Anthropologists have long struggled with the question of how to describe contemporary work regimes which do not produce anything tangible. Stein demonstrates that elite work is predominantly abstract in the fourfold sense that it is epistemically removed from the object of analysis, emotionally detached from it, several steps away from the assumed sources of economic value creation, and increasingly hard to grasp. In doing so, he offers new ways to think about white collar work and elites in the 21st century and

establishes the notion of abstract labour as a key category in social anthropology The Future of Urban Logistics Gabriel Socha,2019-05-17 Seminar paper from the year 2019 in the subject Business economics Supply Production Logistics grade 1 0 language English abstract This paper deals with a selection of the most important future oriented questions in the field of urban logistics It analyzes the relevance of urban logistics examines transportation types of the future and discusses the impact of demographic change and labor shortage on the logistics market Further the concept Post 4 0 is critically questioned and it is reflected to what extent the fields procurement and production logistics are influenced by the global trends Lastly a conclusion summarizes the most important findings and introduces additional research fields Urban logistics is a topic of increasing interest to both research and practice Reasons for this are diverse Population growth in urban areas is expected to continue meaning that by 2030 79% of the German population will live in these areas This in turn has an impact on the already growing e commerce which is a major driver for parcel delivery As a result parcel volume is expected to reach 5 billion pieces per year by 2026 equaling a growth of 100% since 2016 With a growing volume not only the complexity of routes and business scalability increases but also environmental problems which are already the focus of various stakeholders anyway Thus logistics companies are required to develop innovative solutions such as those derived from the possibilities of digitalization in order to meet the increasing and changing demands of stakeholders
