and innovation in the context of high value products and services The approach presented here is based on three main pillars
an adaptation mechanism based on a broad understanding of system dependencies efficient use of system knowledge through
involvement of actors throughout the process and technological solutions to enable efficient actor communication and
information handling The book provides readers with a better understanding of the factors that influence decisions and put
forward solutions to facilitate the rapid adaptation to changes in the business environment and customer needs through
intelligent upgrade interventions Further it examines a number of sample cases from various contexts including car
manufacturing utilities shipping and the furniture industry The book offers a valuable resource for both academics and
practitioners interested in the upgrading of capital intensive products and services The work performed in the project Use It
