Unique Full color Netter's Anatomy art is included in a separate section for easy reference and cross-referenced within the Tabular List of Diseases and Injuries to help you understand anatomy and how it may affect choosing codes. Full color design includes consistent color-coded symbols and text providing easier access to codes and coding information. American Hospital Association's Coding Clinic citations include official ICD 10 CM coding advice relating to specific codes and their usage. 175 full color illustrations provide visual orientation and enhance understanding of specific coding situations. Items are included throughout the Tabular List to ensure accurate coding, providing additional information on common diseases and conditions. Additional elements within specific codes define terms and add coding instructions relating to difficult terminology, diseases and conditions, or coding in a specific category. Symbols and highlights draw attention to codes that may require special consideration before coding, including New Revised and Deleted Codes that call for the use of additional characters. Includes Excludes 1 and Excludes 2. Use Additional Unspecified Code First and Code Also Placeholder X symbol reminds you to assign placeholder X for codes less than 6 characters that require a 7th character. Manifestation code identifies conditions for which it is important to record both the etiology and the symptom of the disease. Age and Sex edits from the Definition of Medicare Code Edits help to ensure accuracy by denoting codes that are used only with patients of a specific age or sex.
