Designing U and Z-shaped concrete sections

Stephen Pienaar - 2020-08-09 - 0 Comments - in C01:Continuous beam / slab design

Can you design and detail U or Z-shaped sections with Continuous Beam/Slab Design?

Continuous Beam/Slab Design allows you to design sections with or without top and bottom flanges. A section has a single web, and its top and bottom flanges (if specified) are assumed to have the same vertical centre line. You can move the web sideways relative to the flanges using the web offset parameter. Within these parameters, the following shapes are possible:

1. Rectangular (no flanges)
2. I-section (both top and bottom flanges)
3. T-section (no bottom flange)
4. Inverted T-section (no top flange)
5. L-section (top or bottom flange with web offset to the side)
6. U-section on its side (top and bottom flanges with same width, and web offset to the side)
