Intro: outline the questions heading and introduce basic arguments and reference to key theorists prominent in the answer.

Paragraph:

Point – Highlight the underlying point to the paragraph and what will be discussed basically.

Examples – Highlight examples and provide a deeper explanation of what the point relates to in order to make point thorough for examiner (may include statistical data).

Evidence – Introduce Key theorist or a key concept which relates to the ideas previously mentioned at the beginning of the paragraph (link back).

Conclusion – A typical summarisation of the points which have been outlined by the theorist and how they link to the question at hand in order to make the sure the answer doesn't go off topic.

Evaluation – This section comes in two parts. Firstly, introduce a small study or a theorist which backs up the aforementioned theorist (statistics as well). The theorist can too be praised for other factors such as relevance of study, influence of study, or research methods.

Secondly, the theory needs to be criticised. Firstly, either outline key criticism and 'holes' in the study that need to be addressed (the study might fail to address certain issues or it may be very dated). If possible, the research methods of the study should be criticised (TOP BAND). Another theorist/study should be brought in as a counter-argument.
