concepts presented Second exercises have been added that require students to estimate approximate interpret a result write a summary create a model explore or find a generalization Third graphing calculators have been incorporated to a greater extent through the addition of examples and exercises as well as the inclusion of a cross referenced appendix on the use of the TI 82 83 All of this has been accomplished without compromising the mathematical integrity that is the hallmark of this text *7 Algorithm Design Paradigms* Sung-Hyuk Cha,2020-06-01 The intended readership includes both undergraduate and graduate students majoring in computer science as well as researchers in the computer science area The book is suitable either as a textbook or as a supplementary book in algorithm courses Over 400 computational problems are covered with various algorithms to tackle them Rather than providing students simply with the best known algorithm for a problem this book presents various algorithms for readers to master various algorithm design paradigms Beginners in computer science can train their algorithm design skills via trivial algorithms on elementary problem examples Graduate students can test their abilities to apply the algorithm design paradigms to devise an efficient algorithm for intermediate level or challenging problems Key Features Dictionary of computational problems A table of over 400 computational problems with more than 1500 algorithms is provided Indices and Hyperlinks Algorithms computational problems equations figures lemmas properties tables and theorems are indexed with unique identification numbers and page numbers in the printed book and hyperlinked in the e book version Extensive Figures Over 435 figures illustrate the algorithms and describe computational problems Comprehensive exercises More than 352 exercises help students to improve their algorithm design and analysis skills The answers for most questions are available in the accompanying solution manual *Computers & Information Processing* Gerald A.
