Heartificial Intelligence John Havens,2016-02-02 As we program machines to be more like humans how will they know what we value if we don't know ourselves The notion of robots gaining consciousness is beginning to become a reality but the future of human happiness is dependent on our ability to teach machines what we value the most today Featuring pragmatic solutions drawing on economics emerging technologies and positive psychology Heartificial Intelligence provides a road map to help readers embrace the present and better define their future Using fictional vignettes to help readers relate to larger concepts this book paints a vivid portrait of how our lives might look in either a dystopia of robot dominance or a utopia where we use technology to enhance our natural abilities and evolve into a long lived super intelligent and caring species

Bad Ink Riki Wilchins, 2024-07-09 In BAD INK award winning trans activist Riki Wilchins definitively chronicles how and why the nation's newspaper of record became the leading national voice for attacking transgender kids Beginning in 2015 just as A G Sulzberger was taking over as Publisher the New York Times underwent a strange shift from its long time support for transgender rights overnight it became the nation's leading voice attacking transgender kids In nearly 70 000 words in dozens of articles it attacked their right to transition to medical care to sports participation even the very idea that they were transgender It was as Tom Scocca summed up in Popula a plain old fashioned newspaper crusade But the Times crusade wasn't based on new reporting or fresh medical evidence but on talking points being promoted by white Christian nationalist organizations devoted to eradicating gay and transgender people And it was timed just as MAGA politicians introduced over 1 000 bills in scores of states to outlaw every aspect of trans kids lives It was all apparently part of Sulzberger's new plan to remake that liberal rag so it could appeal to right wing readers for the digital age And unfortunately it worked A much needed book that only becomes more necessary by the day Wilchins BAD INK presents an unflinching clear eyed analysis of the role the Times has played in reversing the course of trans rights Harron Walker VICE Combining close readings of the Times robust factchecking astute observation and Wilchins signature cutting prose BAD INK is a must read book for anyone who wants to understand how we got where we are today TJ Billard PhD Assoc Professor Northwestern Univ Director Center for Applied Transgender Studies I can't stop reading this book Bad Ink is the clearest most coherent dissection of the Times decision to trade journalistic integrity for clicks at the expense of trans kids Every reporter should be tasked with reading this book Kate Sosin The 19th News **Unbroken and Unbowed** Jimmie R. informative volume Jimmie R Hawkins walks the reader through the many forms of Black protest in American history from pre colonial times through the George Floyd protests of 2020 Hawkins breaks American history into five sections with subsections highlighting how Black identity helped to shape protest during that period These protests include slave ship mutinies the abolitionist movement the different approaches to protest from Frederick Douglass W E B Dubois and Booker T Washington protest led by various Black institutions Black Lives Matter movements and protests of today s Black athletes musicians and intellectuals such as LeBron James Beyonce and Kendrick Lamar Hawkins also covers the backlash to these protests including the Jim Crow era the Red Summer of 1919 and modern day wars on the Black community in the form of the War on Drugs and voter suppression *Television by Stream* Christina Adamou,Sotiris Petridis,2023-05-22 Online television streaming has radically changed the ways in which programs are produced disseminated and watched While the market is largely globalized with some platforms streaming in multiple countries audiences are fragmented due to a large number of choices and often solitary viewing However streaming gives new life to old series and innovates conventions in genre narrative and characterization This edited collection is dedicated to the study of the streaming platforms and the future of television It includes a plethora of carefully organized and similarly structured chapters in order to provide in depth yet easily accessible readings of major changes in television Enriching a growing body of literature on the future of television essays thoroughly assess the effects new television media have on institutions audiences and content **Algorithms to Live By** Brian Christian,Tom Griffiths,2016-04-19 An exploration of how computer algorithms can be applied to our everyday lives to solve common decision making problems and illuminate the workings of the human mind What should we do or leave undone in a day or a lifetime How much messiness should we accept What balance of the new and familiar is the most fulfilling These may seem like uniquely human quandaries but they are not Computers like us confront limited space and time so computer scientists have been grappling with similar problems for decades And the solutions they ve found have much to teach us In a dazzlingly interdisciplinary work Brian Christian and Tom Griffiths show how algorithms developed for computers also untangle very human questions They explain how to have better hunches and when to leave things to chance how to deal with overwhelming choices and how best to connect with others From finding a spouse to finding a parking spot from organizing one s inbox to peering into the future *Algorithms to Live By* transforms the wisdom of computer science into strategies for human living Summary of Algorithms to Live By Instaread,2016-09-07 Summary of Algorithms to Live By by Brian Christian and Tom Griffiths Includes Analysis Preview *Algorithms to Live By* by Brian Christian and Tom Griffiths is an immersive look at the history and development of several algorithms used to solve computer science problems It also considers potential applications of algorithms in human life including memory storage and network communication One such computer science problem is the optimal stopping problem the mathematical puzzle for determining how long to review options and gather data before settling on the best choice available The algorithm based on statistical analysis shows that

there is an optimal place or time to stop researching options or solutions to a problem and instead commit to the next option that's just as good as those already considered. Similarly, the mathematical way to decide whether to try something new or stick with the familiar choice is expressed by the Gittins Index score of any given alternative. It values a complete unknown more highly than a known one.
