Construction

Published by FIDIC, 1999. This is the 1999 edition of the Conditions of Contract for Construction, which is the most widely used contract form in the world. It is a model contract form that can be used for a wide range of construction projects. The contract is divided into four parts: General Conditions, Particular Conditions, and two Schedules. The General Conditions are divided into 20 articles, which cover the following areas: General, Contract Documents, Contract Agreement, Appointment of the Engineer, Appointment of the Contractor, Insurance, Payment, Termination, Dispute Resolution, and Final Account. The Particular Conditions are used to tailor the contract to the specific project. The Schedules are used to provide details of the project, such as the program of work and the list of materials and equipment.
