Botkin,1990 Global warming acid rain the depletion of forests the polluting of our atmosphere and oceans the threats to our environment are numerous raising justifiable concern among most of us and genuine alarm in some But as scientist Daniel Botkin argues in this provocative new book our ability to solve these problems is limited not by our scientific knowledge but by the age old myths and metaphors that shape our perception of the natural world Indeed our beliefs about nature have fallen well behind our knowledge Daniel Botkin is a seasoned scientist He has spent three decades in the field studying the changes and interactions of forests and animal species In the 1960s he pioneered the use of computers to predict ecological trends Now in *Discordant Harmonies* he combines his considerable expertise with the well honed eye of the nature writer and a philosopher's sense of how ideas shape our perceptions of reality to take us on a marvelous guided tour of the natural world His method is to introduce a problem in our beliefs about nature by giving us a fascinating case study of predator prey relationships of forests evolving over centuries of species nearing extinction of the ways our protection of nature has had surprising and often disappointing results Botkin's revealing case studies also highlight controversial present day issues like controlled burning in national forests fishing and hunting quotas and policy making for management of natural resources He looks at each of these cases in the light of past thinking and current research revealing how old myths often blind us to the new technology and to the ways of thinking we need to solve our environmental problems Above all Botkin is concerned with finding the delicate balance between man and nature that place where human needs and the intricate systems of nature can viably coexist Whether discussing moose herds on Isle Royale or Yosemite's famous Mariposa Grove of Sequoias Botkin writes vividly and insightfully about nature challenging us to rethink some of our most cherished notions Anyone who is concerned about the environment will find much here to ponder as well as the pleasure of meeting a stimulating and thoughtful mind at work      **Ecology** ,1974
