Mega Construction Projects Using Stakeholder Management:

Sustainable Management of Transnational Megaprojects Dario Cottafava, Daniel Torchia, Stefania Camoletto, Laura Corazza, 2024-04-04 This book analyses the seminal role of megaprojects for sustainable development and the related complex challenges they bring. It provides insights into the growing social responsibilities that megaprojects have not only to be environmentally sustainable but also towards the multitude of stakeholders involved whether directly or indirectly. After an historical overview of the increasingly necessary links between sustainable infrastructure and megaprojects, the book builds on and applies stakeholder theory to stakeholder engagement and management in megaprojects. It also emphasizes the importance of building impact assessment frameworks that consider the unheard voices that are often passively sitting at the receiving end of a megaproject as well as the local context where the megaproject is embedded. The book then proceeds to analyse the case of a very contested transnational railway megaproject between Italy and France, the Turin-Lyon high speed railway, which has been suffering from stakeholder and communication issues for over thirty years, as well as from notable managerial and legal differences in the two countries. In this way, the book informs both theory and practice and encourages scholarly interventions into wicked problems. It contains a comprehensive review of the academic literature on the sustainability challenges and sustainability reporting of megaprojects. Conceptual models, frameworks, and future research opportunities are provided to clarify the empirical challenges and highlight the gaps and opportunities to be explored by researchers and practitioners in the future. The audience for the book is both academic researchers and practitioners in the field of megaprojects and more specifically those dealing with managing transnational megaprojects. It also includes several topics that will be of interest to policy and decision makers. [Construction Project Monitoring and Evaluation](#)

Callistus Tengan, Clinton Aigbavboa, Wellington Didibhuku Thwala, 2021-04-27 This book will provide readers with an in-depth theoretical awareness and practical guidance on the implementation of an effective monitoring and evaluation (M/E) system to ensure construction projects meet approved quality, cost, time, and social sustainability objectives. The authors discuss the drivers, challenges, determinants, and benefits of effective M/E implementation together with the theories and models underpinning construction project M/E practices. Further, a comparative overview of M/E practices in developed and developing countries is presented to elucidate the best practices. The book first conceptualizes M/E as a five-factor model comprising stakeholder involvement, budgetary allocation, and logistics, technical capacity, and training, leadership, and communication. It then presents an M/E case study on the Ghanaian construction industry before expanding on the idea of M/E systems as an effective tool for project performance and in optimizing a project's contribution to society and the environment. The book further provides guidance on M/E practice for construction project managers, investors, professionals, researchers, and other stakeholders and is therefore of interest to those in architecture, construction, engineering, planning, project management, and development studies. *Fundamental Theories of Mega Infrastructure Construction Management*

Zhaohan Sheng, 2017-10-20 *Fundamental Theories of Mega Infrastructure Construction Management Theoretical Considerations from Chinese Practices* is a collection of decades of research and applications of managing megaprojects using theories of complex systems and management sciences. It presents basic classical theory of megaproject management and is a showcase of more than 30 years of research of complex system and management sciences on the theory of megaproject management resulting from the integrating of theory and practice of megaprojects. The theory and models have undergone rigorous systematic testing during the management and implementation of megaprojects in China. Megaprojects are huge undertakings often in infrastructure bridges tunnels airports etc that involve huge levels of investment often take years to complete and typically run into delays cost overruns and any number of unforeseen problems. Over the last few decades no one country has undertaken more of these projects than China and this book presents the fundamental theories underlying the practice of Mega Infrastructure Construction Management as practiced in China. Individual chapters provide a basic definition of Mega Infrastructure Construction and its management an overview of the theories behind it the Formation Path basic concepts fundamental principles scientific problems the Method System of Meta synthesis specialized methods in research and intelligent management of Mega Infrastructure Construction. Although the theoretical construction management problems in this book are derived from construction practices in China they can be applied universally and extended for great fundamental significance. The Construction Industry in the Fourth Industrial Revolution Clinton Aigbavboa, Wellington Thwala, 2019-08-09

This book gathers papers from the 11th Construction Industry Development Board cidb Postgraduate Research Conference held on 28-30 July 2019 in Johannesburg South Africa. The conference provided an essential forum for reviewing and generating knowledge on Construction 4.0 and consequently highlighted processes and practices that allow us to deliver and operate built environment assets more effectively and efficiently by focusing on physical to digital and digital to physical transformation. The event addressed three broad themes: Industrial production prefabrication 3D printing and assembly offsite and advanced manufacturing; Cyber physical systems actuators sensors IoT robots and cobots for repetitive and dangerous tasks and drones for mapping progress monitoring safety and quality inspections lifting moving and positioning and Technologies; digital ecosystems digital platforms BIM video and laser scanning AI and cloud computing big data and data analytics reality capture blockchain simulation virtual and augmented reality data standards and interoperability and vertical and horizontal integration. Given its scope the book will be of interest to all construction industry and architectural professionals who want to learn about cutting edge technologies applied to construction.

Carbon neutrality approaches in buildings and agriculture sectors Hongyun Si, Xianbo Zhao, Guangdong Wu, Ge Wang, 2023-02-27 *Routledge Handbook on Labour in Construction and Human Settlements* Edmundo Werna, George Ofori, 2023-12-12 *Routledge Handbook on Labour in Construction and Human Settlements* presents a detailed and comprehensive examination of the relationship between labour and the built environment and synergises these critical focus

areas in innovative ways This unrivalled edited collection of chapters analyses problems and presents possible solutions related to the employment and conditions of workers in the construction industry It provides comprehensive coverage of the relationship between the global workforce and the built environment and is divided into four topical areas how labour and the built environment relate to development employment generation in the built environment quality of employment in the built environment and the impact of the built environment on labour in other sectors Underpinning the entire book is the premise that the way the built environment is produced and its main products buildings cities and towns have an impact on large numbers of workers At the same time the quality of the built environment requires construction workers who are well trained and with good working conditions While cities and towns are the engines of economic growth they will not be able to fulfil their economic potential if poverty in the workforce is not addressed Those who are unemployed underemployed or work in unfavourable conditions cannot fully contribute to production and at the same time are limited in their ability to purchase goods and services therefore limiting economic growth and restricting improvements in their living standards In addition investments in infrastructure housing and inner city redevelopment cannot be sustainable if labour issues i e poverty are not addressed This book aims at analysing this complex set of issues comprehensively and will be essential reading to a wide range of researchers across the interdisciplinary intersections of construction business and management economic development urban studies sociology political science and project management
