From Justinian to Branimir Danijel Džino, 2020-10-25 From Justinian to Branimir explores the social and political transformation of Dalmatia between c 500 and c 900 AD The collapse of Dalmatia in the early seventh century is traditionally ascribed to the Slav migrations However more recent scholarship has started to challenge this theory looking instead for alternative explanations for the cultural and social changes that took place during this period Drawing on both written and material sources this study utilizes recent archaeological and historical research to provide a new historical narrative of this little known period in the history of the Balkan peninsula This book will appeal to scholars and students interested in Byzantine and early medieval Europe the Balkans and the Mediterranean It is important reading for both historians and archaeologists

The Intangible Elements of Culture in Ethnoarchaeological Research Stefano Biagetti, Francesca Lugli, 2016-06-02 This volume focuses on the intangible elements of human cultures whose relevance in the study of archaeology has often been claimed but rarely practiced In this book the authors successfully show how the adoption of ethnoarchaeological perspectives on non material aspects of cultures can support the development of methodologies aimed at refining the archaeological interpretation of ancient items technologies rituals settlements and even landscape The volume includes a series of new approaches that can foster the dialogue between archaeology and anthropology in the domain of the intangible knowledge of rural and urban communities The role of ethnoarchaeology in the study of the intangible heritage is so far largely underexplored and there is a considerable lack of ethnoarchaeological

studies explicitly focused on the less tangible evidence of present and past societies Fresh case studies will revitalize the theoretical debate around ethnoarchaeology and its applicability in the archaeological and heritage research in the new millennium Over the past decade intangible has become a key word in anthropological research and in heritage management Archaeological theories and methods regarding the explorations of the meaning and the significance of artifacts resources and settlement patterns are increasingly focusing on non material evidence Due to its peculiar characteristics ethnoarchaeology can effectively foster the development of the study of the intangible cultural heritage of living societies and highlight its relevance to the study of those of the past **Baal** ,2006 *Trübner's Bibliographical Catalogues* Kegan Paul, Trench, Trubner & Co,1925 **Mellanges de l'Universite Saint-joseph** Université Saint-Joseph (Beirut, Lebanon),1975
