The Small Library Manager's Handbook Alice Graves, 2014-10-16 The Small Library Manager's Handbook is for librarians working in all types of small libraries. It covers the everyday nuts and bolts operations that all librarians must perform. Following an introduction, 27 chapters are arranged in six major parts: Management including staffing, working with volunteers, and annual reports; Marketing including social networking and how to prove your library's worth to your boss; Money including budgeting and grant writing; Services including reference and circulation; Collection Development including assessment and weeding; and Professional Development including free webinars, YouTube videos, and networking. Each chapter is written by an expert. The chapter authors work in academic, public, and special libraries. They work in hospitals, prisons, museums, colleges, courthouses, and corporations. Their libraries consist of books across the Library of Congress or Dewey Decimal system, and they work in specialized libraries that use a limited range of cataloging possibilities. Librarians in small libraries wear many hats. This handbook, written by experts who are small librarians themselves, will help all small librarians to do multiple jobs at the same time. The Evaluation and Measurement of Library Services Joseph R.

Matthews, 2017-10-27 This guide provides library directors, managers, and administrators in all types of libraries with complete and up-to-date instructions on how to evaluate library services in order to improve them. It's a fact: today's libraries must evaluate their services in order to find ways to better serve patrons and prove their value to their communities. In this greatly updated and expanded edition of Matthews' seminal text, you'll discover a breadth of tools that can be used to evaluate any library service, including newer tools designed to measure customer and patron outcomes. The book offers practical advice backed by solid research on virtually every aspect of evaluation, including quantitative and qualitative tools, data analysis, and specific recommendations for measuring individual services such as technical services and reference and interlibrary loan. New chapters give readers effective ways to evaluate critical aspects of their libraries, such as automated systems, physical space, staff performance, management frameworks, eBooks, social media, and information literacy. The author explains how broader and more robust adoption of evaluation techniques will help library managers combine traditional internal measurements, such as circulation and reference transactions, with more customer-centric metrics that reflect how well patrons feel they are served and how satisfied they are with the library. By applying this comprehensive strategy, readers will gain the ability to form a truer picture of their library's value to its stakeholders and patrons. **Leadership and**

Management Competence in Nursing Practice Audrey M. Beauvais, 2018-11-28 Written specifically for the experienced nurse enrolled in an RN to BSN program, this text guides nurses through an interactive critical thinking process to become effective and confident nurse leaders. All nurses involved with direct patient care already rely on similar strategies to oversee patient safety, make care decisions, and integrate plan of care in collaboration with patients and families. This text expands upon that knowledge and provides a firm base to reach the next steps in academia and practice, enabling the BSN-prepared
