Distillation Engineering H:

Engineering ,1925 Process Synthesis and Process Intensification Ben-Guang Rong,2017-09-25 Process synthesis and process intensification are becoming state of the art scientific fields that provide the methods and tools to improve process technologies in terms of high energy efficiency low capital investment low emissions improved safety and less hazardous byproducts to achieve sustainable products and processes The book covers manufacturing processes from both fossil and biomass based feedstocks for graduate students

Chemical Engineering Design Ray Sinnott,2014-06-28 This 2nd Edition of Coulson agitated vessels are now covered and the discussion of fired heaters and plate heat exchangers extended The appendices have been extended to include a computer program for energy balances illustrations of equipment specification sheets and heat exchanger tube layout diagrams This 2nd Edition will continue to provide undergraduate students of chemical engineering chemical engineers in industry and chemists and mechanical engineers who have to tackle problems arising in the process industries with a valuable text on how a complete process is designed and how it must be fitted into the environment

Mass Transfer Koichi Asano,2007-09-24 This didactic approach to the principles and modeling of mass transfer as it is needed in modern industrial processes is unique in combining a step by step introduction to all important fundamentals with the most recent applications Based upon the renowned author s successful new modeling method as used for the O 18 process the exemplary exercises included in the text are fact proven taken directly from existing chemical plants Fascinating reading for chemists graduate students chemical and process engineers as well as thermodynamics physicists

Preliminary Chemical Engineering Plant Design W.D. Baasal,1989-11-30 This reference covers both conventional and advanced methods for automatically controlling dynamic industrial processes

Hydrocarbon Processing & Petroleum Refiner ,1965 Emerging Technologies for Food Processing Da-Wen Sun,2014-08-14 The second edition of Emerging Technologies in Food Processing presents essential authoritative and complete literature and research data from the past ten years It is a complete resource offering the latest technological innovations in food processing today and includes vital information in research and development for the food processing industry It covers the latest advances in non thermal processing including high pressure pulsed electric fields radiofrequency high intensity pulsed light ultrasound irradiation and addresses the newest hurdles in technology where extensive research has been carried out Provides an extensive list of research sources to further research development Presents current and thorough research results and critical reviews Includes the most recent technologies used for shelf life extension bioprocessing simulation and optimization
