Tackling Health Inequalities Dennis Raphael, 2012 Tackling Health Inequalities Lessons from International Experiences provides a unique perspective on health inequalities in Canada and elsewhere This exciting new volume brings together experiences from seven wealthy developed nations the United States Australia Britain and Northern Ireland Canada Finland Norway and Sweden to analyze their contrasting approaches to reducing avoidable health problems Some nations are successfully responding to health inequalities but Canada and the United States are not among them Why is this and what can we learn from other nations Through a political economy lens Tackling Health Inequalities considers how societal structures and institutions shape the distribution of economic political and social resources that affect health disparities

amongst the population The volume then goes on to examine how governing authorities come to either confront or ignore these health inequalities and the conditions that create them Through these illustrations it encourages governing authorities that are tackling health inequalities to continue their efforts and directs those that are not such as in Canada and elsewhere towards what must be done This groundbreaking text shows the primary lessons from these international experiences that citizens in Canada and elsewhere need to educate themselves about the importance of tackling health inequalities and then build the political and social movements that will compel governmental authorities to take action This volume will serve as a rich resource for professionals and general readers interested in health studies nursing social work public policy and political economy

**Empathy Imperiled** Gary Olson, 2012-12-12 The most critical factor explaining the disjuncture between empathy's revolutionary potential and today's empathically impaired society is the interaction between the brain and our dominant political culture The evolutionary process has given rise to a hard-wired neural system in the primal brain and particularly in the human brain This book argues that the crucial missing piece in this conversation is the failure to identify and explain the dynamic relationship between an empathy gap and the hegemonic influence of neoliberal capitalism through the analysis of the college classroom the neoliberal state media film and photo images marketing of products militarization mass culture and government policy This book will contribute to an empirically grounded dissent from capitalism's narrative about human nature Empathy is putting oneself in another's emotional and cognitive shoes and then acting in a deliberate appropriate manner Perhaps counter-intuitively it requires self-empathy because we're all products of an empathy-anesthetizing culture The approach in this book affirms a scientific basis for acting with empathy and it addresses how this can help inform us to our current political culture and process and make it of interest to students and scholars in political science psychology and other social sciences
