Deep, Dark and Dangerous Vickie Jensen, 2021-10-30 How British Columbia became an international hotspot for submarines submersibles Newt Suits underwater robotics and a host of other cutting edge undersea technologies In *Deep Dark and Dangerous* maritime historian Vickie Jensen explores the fascinating story of British Columbia s rise to become a world leader in the underwater tech industry tracing BC s colourful history and bright future as a front runner in the world of subsea technology innovation This little known saga began with the remarkable story of *Pisces I* In the early 1960s two commercial hard hat divers from the Vancouver area Don Sorte and Al Trice and engineer Mack Thompson realized that they

needed a small manned submersible with robot arms for deep sea work They couldn't find one to buy so they decided to build their own Experts told them such things could only be built in specialized facilities and it would be suicidal to try a home made version Just over two years and 100 000 later their Pisces I was successfully making two thousand foot dives The three innovators formed a company called International Hydrodynamics HYCO as orders started to arrive from around the world In the process of building some fourteen submersibles HYCO would serve as an incubator for a generation of experts that would launch an entire industry of subsea companies in BC Drawing on her background in documenting both history and industry Vickie Jensen uncovers stories both historical and current detailing the submarines submersibles robots torpedo recovery technology and inventions that are responsible for BC's remarkable and continuing subsea reputation Written with colour and flair this is a fascinating and exciting story that anyone can enjoy Leveraging Applications of Formal Methods, Verification and Validation. Vidal, Tarla Rai Peterson, 2020-02-12 The last five years have been extremely challenging but also very innovative for cephalopod science and the outstanding tradition of biological contribution with cephalopod molluscs as key players in science and human activities and interests has continued This Research Topic is one of several dedicated to cephalopod molluscs e g Hanke and Osorio 2018 Ponte et al 2018 hosted by Frontiers over the last few years not to mention other papers published separately Highlighting of cephalopod science is important because it has much to offer not only the life science community but also more broadly the public perception of science and its understanding and relationship with scientific endeavour and cephalopods as living organisms and part of our everyday life at least for most of us This contribution illustrates the key needs that need to be overcome by the cephalopod research community i e rapid and effective mechanisms for exchange of knowledge and resources sharing of laboratory protocols videos tissues samples and data sets innovative approaches and initiatives in public engagement The cuttlefish comic included is an excellent example of a type of media that can be used to expand scientific knowledge to the public and human relationship with live animals There are strategic challenges in convincing globally distributed policy makers and funders of the relevance of cephalopods in scientific advances and also in the regulatory aspects since cephalopods are the only invertebrates whose use is regulated in Europe in a research context and this increases the need for integrated oversight and direction in terms of ethics and animal welfare e g Jacquet et al 2019a 2019b Ponte et al 2019 This Research

Topic also aligns with the interests of the cephalopod community in stimulating public interest in cephalopods extending to a broader audience that could include chefs and gourmets and fishers and scientists aiming to develop sustainable food resources CephInAction Towards Future Challenges for Cephalopod Science Research Topic includes 14 papers from about 40 authors representing ten different countries thus overlapping with the original parties that contributed to the COST FA1301 that together with CephRes promoted and supported this editorial initiative **Stanford Bulletin** ,2002 *Soft Robotics based on Electroactive Polymers* Guoying Gu,Herbert Shea,Stefan Seelecke,Gursel Alici,Gianluca Rizzello,2021-06-17 **Assessment of Technologies Supported by the Office of Science and Technology Department of Energy, Results of Peer Review for Fiscal Year ...** ,2000 **Robomatix Reporter** ,1986 *Directory of American Research and Technology* ,1997 Who's who in Technology Today: Mechanical, civil, energy and earth science ,1984 **Ocean Science News** ,1988 **Robotics Abstracts** ,1990 *The Virginia Engineer* ,2003 *The Directory of Graduate Studies* ,1999 Peterson's Guide to Graduate Programs in Engineering and Applied Sciences ,1991 Applied Science & Technology Index ,1996
