Satisfaction, and Employee Well-Being in the Fourth Industrial Revolution Abe, Ethel Ndidiamaka,2020-11-13

Disruptions are being caused in the workplace due to the development of advanced software technology and the speed at which these technological advancements are being produced. These disruptions could take diverse forms and affect various aspects of work and the lives of entities in the workplaces and families of the individual employees. Work and family are caught in the crossfire between technological disruptions and human adaptation. Hence there is a need to assess the overall effect that the Fourth Industrial Revolution would have on work, employee, work, family, satisfaction, and employee well-being.

Future of Work: Work, Family, Satisfaction, and Employee Well-Being in the Fourth Industrial Revolution is a critical reference source that discusses practical solutions and strategies to manage challenges and address fears regarding the effect of the Fourth Industrial Revolution on the future of employment and the workforce. Featuring research on topics such as corporate governance, job satisfaction, and mental health, this book is ideally designed for human resource professionals, business managers, industry professionals, government officials, policymakers, corporate strategists, consultants, work-life balance experts, human resources, software developers, business policy experts, academicians, researchers, and students. COVID-19 has led to a labour market shock in Canada and is likely to generate a profound reflection on production and consumption habits. COVID-19 is also likely to accelerate automation as firms look to new technologies to pandemic-proof their operations. *Pivot to the Future* Omar Abbosh, Paul Nunes, Larry Downes,2019-04-23

The proven effective strategy for reinventing your business in the age of ever-present disruption. Disruption by digital technologies. That's not a new story. But what is new is the wise pivot: a replicable strategy for harnessing disruption to survive, grow, and be relevant to the future. It's a strategy for perpetual reinvention across the old, now, and new elements of any business. Rapid recent advances in technology are forcing leaders in every business to rethink long-held beliefs about how to adapt to emerging technologies and new markets. What has become abundantly clear in the digital age: conventional wisdom about business transformation no longer works if it ever did. Based on Accenture's own experience of reinventing itself in the face of disruption, the company's real-world client work, and a rigorous two-year study of thousands of businesses across 30 industries, *Pivot to the Future* reveals methodical and bold moves for finding and releasing new sources of trapped value unlocked by bridging the gap between what is technologically possible and how technologies are being used. The freed value enables companies to simultaneously reinvent their legacy and current and new businesses. *Pivot to the Future* is for leaders who seek to turn the existential threats of today and tomorrow into sustainable growth with the courage to understand that a wise pivot strategy is not a one-time event but a commitment to a future of perpetual reinvention where one pivot is followed by the next and the next.

World Employment International Labour Office,1995 The impact of globalization of the world economy on employment throughout the world was examined by determining the causes and effects of the reduction in economic growth that has occurred in most developed and developing countries since 1973 The following were among the factors considered international inequality new technologies effects of globalization on labor demand and labor standards and policy responses to globalization trade and industrialization foreign direct investment adjustment measures labor market regulation The effects of reduced economic growth on a given country s employment patterns levels were found to depend on that country s way of responding to inadequate growth The view that labor market rigidity is the main cause of poor employment performance was refuted It was concluded that although globalization generates real employment problems unemployment declining relative wages and reduced job prospects its potential benefits far outweigh its costs The optimal strategy for encouraging economic development in a global economy was said to be to reap the considerable gains of continued globalization in terms of higher output and efficiency while developing appropriate national and international policies to deal with the social problems engendered by globalization Contains 42 tables figures and 216 endnotes MN
