Hands-On Machine Learning with C++ Kirill Kolodiazhnyi, 2020-05-15 Implement supervised and unsupervised machine learning algorithms using C libraries such as PyTorch C API Caffe2 Shogun Shark ML mpack and dlib with the help of real world examples and datasets Key Features Become familiar with data processing performance measuring and model selection using various C libraries Implement practical machine learning and deep learning techniques to build smart models Deploy machine learning models to work on mobile and embedded devices Book Description C can make your machine learning models run faster and more efficiently This handy guide will help you learn the fundamentals of machine learning ML showing you how to use C libraries to get the most out of your data This book makes machine learning with C for beginners easy with its example based approach demonstrating how to implement supervised and unsupervised ML algorithms through real world examples This book will get you hands on with tuning and optimizing a model for different use cases assisting you with model selection and the measurement of performance You ll cover techniques such as product recommendations ensemble learning and anomaly detection using modern C libraries such as PyTorch C API Caffe2 Shogun Shark ML mpack and dlib Next you ll explore neural networks and deep learning using examples such as image classification and sentiment analysis which will help you solve various problems Later you ll learn how to handle production and deployment challenges on mobile and cloud platforms before discovering how to export and import models using the ONNX format By the end of this C book you will have real world machine learning and C knowledge as well as the skills to use C to build powerful ML systems What you will learn Explore how to load and preprocess various data types to suitable C data structures Employ key machine learning algorithms with various C libraries Understand the grid search approach to find the best parameters for a machine learning model Implement an algorithm for filtering anomalies in user data using Gaussian distribution Improve collaborative filtering to deal with dynamic user preferences Use C libraries and APIs to manage model structures and parameters Implement a C program to solve image classification tasks with LeNet architecture Who this book is for You will find this C machine learning book useful if you want to get started with machine learning algorithms and techniques using the popular C language As well as being a useful first course in machine learning with C this book will also appeal to data analysts data scientists and machine learning developers who are looking to implement different machine learning models in production using varied datasets and examples Working knowledge of the C programming language is mandatory to get started with this book *Ubiquitous Intelligent Systems* P. Karuppusamy, Isidoros Perikos, Fausto Pedro García Márquez, 2021-10-08 This book features a collection of high quality peer reviewed papers presented at International Conference on Ubiquitous Intelligent Systems ICUIS 2021 organized by Shree Venkateshwara Hi Tech Engineering College Tamil Nadu India during April 16 17 2021 The book covers topics such as cloud computing mobile computing and networks embedded computing frameworks modeling and analysis of ubiquitous information systems communication networking

models big data models and applications ubiquitous information processing systems next generation ubiquitous networks and protocols advanced intelligent systems Internet of things wireless communication and storage networks intelligent information retrieval techniques AI based intelligent information visualization techniques cognitive informatics smart automation systems healthcare informatics and bioinformatics models security and privacy of intelligent information systems and smart distributed information systems

[Python Image Processing Cookbook](#) Sandipan Dey,2020-04-17 Explore Keras scikit image open source computer vision OpenCV Matplotlib and a wide range of other Python tools and frameworks to solve real world image processing problems Key Features Discover solutions to complex image processing tasks using Python tools such as scikit image and Keras Learn popular concepts such as machine learning deep learning and neural networks for image processing Explore common and not so common challenges faced in image processing Book Description With the advancements in wireless devices and mobile technology there s increasing demand for people with digital image processing skills in order to extract useful information from the ever growing volume of images This book provides comprehensive coverage of the relevant tools and algorithms and guides you through analysis and visualization for image processing With the help of over 60 cutting edge recipes you ll address common challenges in image processing and learn how to perform complex tasks such as object detection image segmentation and image reconstruction using large hybrid datasets Dedicated sections will also take you through implementing various image enhancement and image restoration techniques such as cartooning gradient blending and sparse dictionary learning As you advance you ll get to grips with face morphing and image segmentation techniques With an emphasis on practical solutions this book will help you apply deep learning techniques such as transfer learning and fine tuning to solve real world problems By the end of this book you ll be proficient in utilizing the capabilities of the Python ecosystem to implement various image processing techniques effectively What you will learn Implement supervised and unsupervised machine learning algorithms for image processing Use deep neural network models for advanced image processing tasks Perform image classification object detection and face recognition Apply image segmentation and registration techniques on medical images to assist doctors Use classical image processing and deep learning methods for image restoration Implement text detection in images using Tesseract the optical character recognition OCR engine Understand image enhancement techniques such as gradient blending Who this book is for This book is for image processing engineers computer vision engineers software developers machine learning engineers or anyone who wants to become well versed with image processing techniques and methods using a recipe based approach Although no image processing knowledge is expected prior Python coding experience is necessary to understand key concepts covered in the book
