Beginning Reader Chapter S:

The Early Reader in Children's Literature and Culture Jennifer Miskec, Annette Wannamaker, 2015-12-22 This is the first volume to consider the popular literary category of Early Readers books written and designed for children who are just beginning to read independently It argues that Early Readers deserve more scholarly attention and careful thought because they are for many younger readers their first opportunity to engage with a work of literature on their own to feel a sense of mastery over a text and to experience pleasure from the act of reading independently Using interdisciplinary approaches that draw upon and synthesize research being done in education child psychology sociology cultural studies and children's literature the volume visits Early Readers from a variety of angles as teaching tools as cultural artifacts that shape cultural and individual subjectivity as mass produced products sold to a niche market of parents educators and young children and as aesthetic objects works of literature and art with specific conventions Examining the reasons such books are so popular with young readers as well as the reasons that some adults challenge and censor them the volume considers the ways Early Readers contribute to the construction of younger children as readers thinkers consumers and as gendered raced classed subjects It also addresses children's texts that have been translated and sold around the globe examining them as part of an increasingly transnational children's media culture that may add to or supplant regional ethnic and national children's literatures and cultures While this collection focuses mostly on books written in English and often aimed at children living in the US it is important to acknowledge that these Early Readers are a major US cultural export influencing the reading habits and development of children across the globe

Learning To Read Laurence Rieben, Charles A. Perfetti, 2013-12-16 How does a young child begin to make sense out of squiggles on a page Is learning to read a process of extending already acquired language abilities to print What comprises this extension How children learn to read and especially how children are taught to read are problems of sustained scientific interest and enduring pedagogical controversy This volume presents conceptual and theoretical analyses of learning to read research on the very beginning processes of learning to read as well as research on phonological abilities and on children who have problems learning to read In so doing it reflects the important discovery that learning to read requires mastering the system by which print encodes the language The editors hope that some of the work offered in this text will influence future research questions and will make a difference in the way instructional issues are formulated

Innovating Luis Perez-Breva, 2018-08-28 Discover the MIT developed doer's approach to innovation with this guide that reveals you don't need an earth shattering idea to create a standout product service or business just a hunch that you can scale up to impact Innovation is the subject of countless books and courses but there's very little out there about how you actually innovate Innovation and entrepreneurship are not one and the same although aspiring innovators often think of them that way They are told to get an idea and a team and to build a show and tell for potential investors In *Innovating* Luis Perez Breva describes another approach a doer's approach developed over a decade

at MIT and internationally in workshops classes and companies He shows that innovating doesn't require an earth shattering idea all it takes is a hunch Anyone can do it By prototyping a problem and learning by being wrong innovating can be scaled up to make an impact As Perez Brea demonstrates nothing is new at the outset of what we only later celebrate as innovation In Innovating the process illustrated by unique and dynamic artwork is shown to be empirical experimental nonlinear and incremental You give your hunch the structure of a problem Anything can be a part Your innovating accrues other people's knowledge and skills Perez Brea describes how to create a kit for innovating and outlines questions that will help you think in new ways Finally he shows how to systematize what you've learned to advocate communicate scale up manage innovating continuously and document you need a notebook to converse with yourself he advises Everyone interested in innovating also needs to read this book
