Carlo Scarpa - Layers Anne-Catrin Schultz,2014      *Key Modern Architects* Andrew Higgott,2018-05-31 *Key Modern Architects* provides an accessible and thought provoking introduction to the work of the most significant architects of the modern era Fifty short chapters introduce fifty key architects from Le Corbusier to Aldo Van Eyck to Zaha Hadid exploring their most influential buildings and developing a critique of each architect s work within a broader cultural and historical context The selection represents the most influential architects working from 1890 to the present those most likely to be taught on survey courses in modern architectural history along with some lesser known names with an equal claim to influence Emphasis is placed on a critical and interpretative approach allowing the student to position each architect in a cultural and intellectual context quickly and easily Artistic technical social and intellectual developments are brought to the fore built and unbuilt projects writings and influences This approach brings to light the ideology behind architectural work offering insights into each architect s working practice Helps students to develop a critical approach to understanding modern architectural history One chapter per architect meaning chapters may be read individually as a concise resource for the study of an architect or together as a coherent book length history of the whole period of modern architecture Chapters are supported by boxed lists of each architect s most significant projects along with suggestions for further reading as a springboard to further study and research Combining the clarity and accessibility of a textbook with in depth reading and a critical approach *Key Modern Architects* provides an invaluable resource for both the classroom and for independent study in architectural and art history      *Architecture, Culture, and Spirituality* Thomas Barrie,Julio Bermudez,Phillip James Tabb,2016-03-09 Architecture has long been understood as a cultural discipline able to articulate the human condition and lift the human spirit yet the spirituality of architecture is rarely directly addressed in academic scholarship The seventeen chapters provide a diverse range of perspectives grouped according to topical themes Being in the World Sacred Secular and the Contemporary Condition Symbolic Engagements Sacred Landscapes and Spirituality and the Designed Environment Even though the authors approach the subject from a range of disciplines and theoretical positions all share interests in the need to rediscover redefine or reclaim the sacred in everyday experience scholarly analysis and design      Allure of the Incomplete, Imperfect, and Impermanent Rumiko Handa,2014-12-17 Architects have long operated based on the assumption that a building is complete once construction has finished Striving to create a perfect building they wish for it to stay in its original state indefinitely viewing any subsequent alterations as unintended effects or the results of degeneration The ideal is for a piece of architecture to remain permanently perfect and complete This contrasts sharply with reality where changes take place as people move in requirements change events happen and building materials are subject to wear and tear Rumiko Handa argues it is time to correct this imbalance Using examples ranging from the Roman Coliseum to Japanese tea rooms she draws attention to an area that is usually ignored the allure of incomplete imperfect and impermanent

architecture By focusing on what happens to buildings after they are complete she shows that the afterlife is in fact the very life of a building However the book goes beyond theoretical debate Addressing professionals as well as architecture students and educators it persuades architects of the necessity to anticipate possible future changes and to incorporate these into their original designs Captured Landscape Kate Baker,2018-03-20 The enclosed garden or hortus conclusus is a place where architecture and landscape come together It has a long and varied history ranging from the early paradise garden and cloister the botanic garden and giardini segreto the kitchen garden and as a stage for social display The enclosed garden has continued to develop into its many modern forms the city retreat the redemptive garden the deconstructed building As awareness of climate change becomes increasingly important the enclosed garden which can mediate so effectively between interior and exterior provides opportunities for sustainable design and closer contact with the natural landscape By its nature it is ambiguous Is it an outdoor room or captured landscape is it architecture or garden Kate Baker discusses the continuing relevance of the typology of the enclosed garden to contemporary architects by exploring influential historical examples and the concepts they generate alongside some of the best of contemporary designs brought to life with vivid photography and detailed drawings taken primarily from Britain the Mediterranean Japan and North and South America She argues that understanding the potential of the enclosed garden requires us to think of it as both a design and an experience Captured Landscape provides a broad range of information and design possibilities for students of architectural and landscape design practising architects landscape designers and horticulturalists and will also appeal to a wider audience of all those who are interested in garden design This second edition of Captured Landscape is enriched with new case studies throughout the book The scope has now been broadened to include an entirely new chapter concerning the urban condition with detailed discussions on issues of ecology sustainability economy of means well being and the social pressures of contemporary city life
