Artificial Neural Network Applications in Business and Engineering Do, Quang Hung, 2021-01-08 In today's modernized market various disciplines continue to search for universally functional technologies that improve upon traditional processes Artificial neural networks are a set of statistical modeling tools that are capable of processing nonlinear data with strong accuracy Due to their complexity utilizing their potential was previously seen as a challenge However with the development of artificial intelligence this technology has proven to be an effective and efficient problem solving method Artificial Neural Network Applications in Business and Engineering is an essential reference source that illustrates recent advancements of artificial neural networks in various professional fields accompanied by specific case studies and practical examples Featuring research on topics such as training algorithms transportation and computer security this book is ideally designed for researchers students developers managers engineers academicians industrialists policymakers and educators seeking coverage on modern trends in artificial neural networks and their real world implementations **Nexus Network Journal 14,3** Kim Williams, 2014-03-07 The Winter 2012 vol 14 no 3 issue of the Nexus Network Journal features seven original papers dedicated to the theme Digital Fabrication Digital fabrication is changing architecture in fundamental ways in every phase from concept to artifact Projects growing out of research in digital fabrication are dependent on software that is entirely surface oriented in its underlying mathematics Decisions made during design prototyping fabrication and assembly rely on codes scripts parameters operating systems and software creating the need for teams with multidisciplinary expertise and different skills from IT to architecture design material engineering and mathematics among others The papers grew out of a Lisbon symposium hosted by the ISCTE Instituto Universitario de Lisboa entitled Digital Fabrication A State of the Art The issue is completed with four other research papers which address different mathematical instruments applied to architecture including geometric tracing systems proportional systems descriptive geometry and correspondence analysis The issue concludes with a book review *Computer Numerical Control* Su-Chen Jonathon Lin, 1994 ALSO AVAILABLE INSTRUCTOR SUPPLEMENTS CALL CUSTOMER SUPPORT TO ORDER Instructor's Manual ISBN 0 8273 4716 2

Network World, 2000-10-02 For more than 20 years Network World has been the premier provider of information intelligence and insight for network and IT executives responsible for the digital nervous systems of large organizations Readers are responsible for designing implementing and managing the voice data and video systems their companies use to support everything from business critical applications to employee collaboration and electronic commerce **International Conference on Computer Science and Network Security (CSNS 2014)**, 2014-06-11 held from April 12 to 13 2014 in Xi'an China The purpose of CSNS2014 is to provide a platform for researchers engineers and academicians as well as industrial professionals to present their research results and development on computer science and network security The conference welcomes all the topics around Computer Science and Network Security It provides enormous opportunities for the delegates

to exchange new ideas and application experiences to establish global business or research cooperation The proceeding volume of CSNS2014 will be published by DEStech Publications All the accepted papers have been selected according to their originality structure uniqueness and other standards of same importance by a peer review group made up by 2 3 experts The conference program is of great profoundness and diversity composed of keynote speeches oral presentations and poster exhibitions It is sincerely hoped that the conference would not only be regarded as a platform to provide an overview of the general situation in related area but also a sound opportunity for academic communication and connection

The Industrial Ethernet Networking Guide Donald J. Sterling, Steven P. Wissler, 2003 No nonsense explanations put readers on a critical path to understanding how Ethernet technologies connect industrial device data with manufacturing and business applications to improve productivity and create enterprise and supply chain solutions in depth coverage focuses on the function of Ethernet as a next generation fieldbus as well as the benefits of tying the factory to the enterprise over the

Contemporary fastidious companies are required to eliminate wastes and offer value added products and services to the customers which requirement is fulfilled by adopting the paradigm called lean manufacturing On the other side futuristic companies surge towards reaching the twenty first century mission by reacting quickly in accordance with the dynamic demands of the modern customers for which researchers have been developing a paradigm called agile manufacturing Although various techniques and tools are applied cohesive procedures are yet to be evolved to implement these paradigms systematically and successfully in companies In this context this book is evolved to address students academics practitioners and researchers for gaining theoretical practical and research futuristic knowledge on lean and agile manufacturing paradigms Organised in 18 chapters the text opens with a historical overview of lean and agile manufacturing paradigms It then discusses the lean manufacturing principles with their application procedures The book comprehensively analyses the methods of implementation of lean manufacturing paradigm in both traditional and moderate organisations It also gives an equal treatment to the implementation of agile manufacturing paradigm under four drivers such as management driver technology driver manufacturing strategy driver and competition driver through the adoption of appropriate agile manufacturing criteria The book concludes with a discussion of lean and agile manufacturing paradigms from the perspectives of academia researchers and practitioners The text is well supported by a large number of self test questions

with their answers A unique feature of the book is the inclusion of research avenues at the end of each chapter which enable the readers to carry out researches on these paradigms This book is intended for the undergraduate and postgraduate students of industrial manufacturing production and mechanical engineering **The Furniture Network** Ken Susnjara,2002 Editor & Publisher ,1982-07 Directory of interactive products and services included as section 2 of a regular issue annually 1995 **Machinery and Production Engineering** ,2002 *Production Engineering* ,1984-07 Manufacturing Engineering Handbook, Second Edition Hwaiyu Geng,2015-10-22 The new edition of this professional resource reveals how to optimize all aspects of the global manufacturing process to build the highest quality goods at the lowest price in the shortest possible time How can one apply technical and business knowledge to develop a strategic plan that delivers increased productivity quality sustainability reliability agility resilience and best practices with rapid time to production and value The answers are found in the fully updated new edition of Manufacturing Engineering Handbook The goal of this second edition is to provide the essential knowledge needed to build products with the highest quality at the lowest cost in the least amount of time by optimizing all aspects of the manufacturing process design development tools processes quality speed output safety and sustainability You will gain access to information on conventional and modern technologies manufacturing processes and operations management that will assist you in achieving these goals The book is written by a team of more than 100 internationally renowned manufacturing engineering experts and pared down from its original 1200 pages The new and vastly improved second edition is specifically designed to concisely and succinctly cover traditional manufacturing processes and advanced technologies as well as newer manufacturing software and systems to integrate them into the modern global manufacturing world Brand new chapters on eco design and sustainability nano materials and nano manufacturing facilities planning operations research New sections on plastics composites and moldmaking global manufacturing and supply chain management Increased coverage of Design for Six Sigma and adaptive manufacturing Affiliated web site with color illustrations graphs charts discussions on future trends additional technical papers and suggestions for further reading **Advances in Electromechanical Technologies** V.
