Baker, William Haynes, 2020 Engineering Statics is a free open source textbook appropriate for anyone who wishes to learn more about vectors forces moments static equilibrium and the properties of shapes Specifically it has been written to be the textbook for Engineering Mechanics Statics the first course in the Engineering Mechanics series offered in most university level engineering programs This book s content should prepare you for subsequent classes covering Engineering Mechanics Dynamics and Mechanics of Materials At its core Engineering Statics provides the tools to solve static equilibrium problems for rigid bodies The additional topics of resolving internal loads in rigid bodies and computing area moments of inertia are also included as stepping stones for later courses We have endeavored to write in an approachable style and provide many questions examples and interactives for you to engage with and learn from *Engineering Statics with MATLAB®* Lester W. Schmerr Jr., 2024-03-07 This text makes use of symbolic algebra and vector matrix algebra to demonstrate a new approach to learning statics Symbolic solutions are obtained together with the types of solutions covered in other texts so that students can see the advantages of this new approach This innovative text is an extension of second generation vector Statics courses to a new third generation matrix vector Statics course a course that addresses deformable as well as rigid bodies and employs MATLAB MATLAB is used as a calculator whose built in functions are used to solve statics problems This text uses vectors and matrices to solve both statically determinate rigid body problems and statically indeterminate problems for deformable bodies The inclusion of statically indeterminate problems is unique to this text It is made possible by using symbolic algebra and a new simplified vector matrix formulation that combines the equations of equilibrium the homogeneous solutions to those equations and a description of the flexibilities found in the deformable elements of a
