Technical Analysis In Excel Macd And Rsi Indicators:

Technical Analysis - Myth or Magic? Christian Koessler,2010-12-23 Inhaltsangabe Introduction The following paper will outline the suitability of Technical Analysis TA regarding selective chosen tools for performance increase versus the classic Buy and Hold Strategy BHS These two approaches beside the Fundamental Analysis FA are the foundations used by investors concerning their Investment strategy and differ substantially in their nature Thereby this dissertation will investigate whether the application of active TA is a productive approach yielding to favourable results and having the ability to outperform the passive BHS To achieve substantive results the comparisons of performances will be stretched to 21 years and are based on the following three indices which differ significantly concerning their location volume and importance Standard 200 days and 100 days Moving Average Convergence Divergence Bollinger Bands Oscillators Relative Strength Index Slow Stochastic Momentum TA can be divided into Chartism and the statistical based TA Although a clear demarcation between these groups is not given in reality as most proponents of TA combine both techniques The vast majority of this dissertation will only reflect the latter This can also be justified as Chartists predict future price developments based on trend lines patterns and formations Murphy 1999 states that all Chartists are Technical Analysts but not all Technical Analysts are Chartists Due to the lack of standardised price characteristics Chartism implies a high degree of subjectivity Therefore the absence of operational ability of this sub area would not lead to a feasible analysis concerning an increase in performance We maintain that financial markets are either moving in boom or bust cycles Bull or Bear Markets The classic BHS based on the Investment Legend Benjamin Graham has generated high profits in the Intelligent Systems and Data Science Nguyen Thai-Nghe,Thanh-Nghi Do,Salem Benferhat,2024-11-07 This two volume set constitutes the refereed proceedings of the Second International Conference ISDS 2024 held in Nha Trang Vietnam during November 9 10 2024 The 38 full papers and 10 short papers were carefully reviewed and selected from 129 submissions They were categorized under the topical sections as follows AI in E Commerce Agriculture and Aquaculture AI in Health Care Analytics Big Data IoT and Cloud Computing and Natural Language Processing **Driving Entrepreneurship in Southeast Asia** Vanessa Ratten,2022-03-16 Southeast Asia is one of the most dynamic and entrepreneurial regions in the world Despite its entrepreneurial nature the study of entrepreneurship has largely been on North America and Europe This book showcases the entrepreneurial capabilities that are taking place in Southeast Asia from a digital innovation perspective The book questions the role of entrepreneurship in the Southeast Asian context It also provides a historical analysis of how entrepreneurship is influenced by the history of individual Southeast Asian countries It goes on to examine heritage tourism to explore how entrepreneurship is embedded in cultural and social endeavours and explores how digital technologies and innovations are leading change in the region s business ecosystems The book closes by examining the effects of the pandemic from a risk management perspective to show the interrelationship between crisis management and innovation before

highlighting areas for future research The comprehensive coverage of different countries within Southeast Asia regarding their entrepreneurial initiatives will enrich the existing literature and will be a useful reference to scholars researching entrepreneurship
