Collected Papers I Jack C. Kiefer,1984-12-20 From the Preface Jack Kiefer s sudden and unexpected death in August 1981 stunned his family friends and colleagues Memorial services in Cincinnati Ohio Berkeley California and Ithaca New York shortly after his death brought forth tributes from so many who shared in his life But it was only with the passing

of time that those who were close to him or to his work were able to begin assessing Jack's impact as a person and intellect. About one year after his death an expression of what Jack meant to all of us took place at the 1982 annual meeting of the Institute of Mathematical Statistics and the American Statistical Association. Jack had been intimately involved in the affairs of the IMS as a Fellow since 1957 as a member of the Council as President in 1970 as Wald lecturer in 1962 and as a frequent author in its journals. It was doubly fitting that the site of this meeting was Cincinnati, the place of his birth and residence of his mother, other family and friends. Three lectures were presented there at a Memorial Session by Jerry Sacks dealing with Jack's personal life by Larry Brown dealing with Jack's contributions in statistics and probability and by Henry Wynn dealing with Jack's contributions to the design of experiments. These three papers together with Jack's bibliography were published in the *Annals of Statistics* and are included as an introduction to these volumes: **Current Index to Statistics, Applications, Methods and Theory**, 1997. The Current Index to Statistics (CIS) is a bibliographic index of publications in statistics, probability and related fields. Technical Report University of Wisconsin, Department of Statistics, 1967. **Technical Report**, 1974. The Annals of Mathematical Statistics, 1967. **Journal of Statistical Planning and Inference**, 1996. **Journal of the American Statistical Association**, 2007. A scientific and educational journal not only for professional statisticians but also for economists, business executives, research directors, government officials, university professors and others who are seriously interested in the application of statistical methods to practical problems in the development of more useful methods and in the improvement of basic statistical data. Optimal Stopping Rules Albert Nikolaevich Shiryaev, 1978.
