Praise for 101 Trauma Informed Interventions Linda Curran's unflagging energy and dedication to the healing of traumatized individuals has led to a voluminous, exciting, and comprehensive 101 Trauma Informed Interventions. This workbook provides a plethora of effective tools, traditional as well as innovative, that can be used in whole or as a part of a course of therapy and also as self-help. The variety of options offered goes a long way towards dispelling the unfortunately popular misconception that there are only a limited number of interventions that help people to recover from trauma. Survivors as well as therapists who have been frustrated by the rigidity of strict adherence to evidence-based practice will be greatly relieved to find a wealth of useful strategies to experiment, evaluate, and sort into a personally tailored trauma recovery program. This workbook is a godsend for the trauma field, expanding the possibilities for recovery in a most generous way.

Underlying this eclectic strategy is the common theme emphasizing that healing will only begin when the trauma-related feelings embedded in the body are appreciated.

Porges, Ph.D., author of *The Polyvagal Theory: An interesting compendium of potential interventions that can be interwoven into any therapist's existing conceptual framework*. **Louis Cozolino, Ph.D.**, Pepperdine University and author of 5 books, including the best seller *The Neuroscience of Psychotherapy: Healing the Social Brain*, 2nd edition.
