Hounkannounon,2011 *The Econometrics of Multi-dimensional Panels* Laszlo Matyas,2017-07-26 This book presents the econometric foundations and applications of multi dimensional panels including modern methods of big data analysis The last two decades or so the use of panel data has become a standard in many areas of economic analysis The available models formulations became more complex the estimation and hypothesis testing methods more sophisticated The interaction between economics and econometrics resulted in a huge publication output deepening and widening immensely our knowledge and understanding in both The traditional panel data by nature are two dimensional Lately however as part of the big data revolution there has been a rapid emergence of three four and even higher dimensional panel data sets These have started to be used to study the flow of goods capital and services but also some other economic phenomena that can be better understood in higher dimensions Oddly applications rushed ahead of theory in this field This book is aimed at filling this widening gap The first theoretical part of the volume is providing the econometric foundations to deal with these new high dimensional panel data sets It not only synthesizes our current knowledge but mostly presents new research results The second empirical part of the book provides insight into the most relevant applications in this area These chapters are a mixture of surveys and new results always focusing on the econometric problems and feasible solutions **Festschrift in Honor of Peter Schmidt** Robin C. Sickles,William C. Horrace,2014-03-15 From the Introduction This volume is dedicated to the remarkable career of Professor Peter Schmidt and the role he has played in mentoring us his PhD students Peter s accomplishments are legendary among his students and the profession Each of the papers in this Festschrift is a research work executed by a former PhD student of Peter s from his days at the University of North Carolina at Chapel Hill to his time at Michigan State University Most of the papers were presented at The Conference in Honor of Peter Schmidt June 30 July 2 2011 The conference was largely attended by his former students and one current student who traveled from as far as Europe and Asia to honor Peter This was a conference to celebrate Peter s contribution to our contributions By our contributions we mean the research papers that make up this Festschrift and the countless other publications by his students represented and not represented in this volume Peter s students may have their families to thank for much that is positive in their lives However if we think about it our professional lives would not be the same without the lessons and the approaches to decision making that we learned from Peter We spent our days together at Peter s conference and the months since reminded of these aspects of our personalities and life goals that were enhanced fostered and nurtured by the very singular experiences we have had as Peter s students We recognized in 2011 that it was unlikely we would all be together again to celebrate such a wonderful moment in ours and Peter s lives and pledged then to take full advantage of it We did then and we are now in the form of this volume Estimation and Testing in Dynamic, Nonlinear Panel Data Models Margaret Susan
