Abstract

A hospital is often seen dense with population from all walks of life; it is a dwelling place of healthy and ill persons. This study explored the immunization status, safety hospital practices and compliance to standard precautionary measures of BSN Students in University of Mindanao, Davao City, during academic year 2007-2008. A total of 159 respondents were selected through universal sampling and in the end, the following results was sought:

Of the fourteen (14) clinical wards, health care services were provided more by the respondents in Obstetrics, Gynecology and Pay. The most attended clinical wards include; the Operating room, Pediatric ward, General ward, Pay ward, and the Delivery Room. Respondents immunization status is very low in HA, TT₃, TT₄, and TT₅; Low in DPT, OPV, D1, TT₂ and HB₃ dosages. In BCG, immunization is moderate; high in TT₁ dosage; and very high in HB₁ as well as HB₂. Very few students were completely immunized. The overall hospital safety practices are extensive while the level of compliance to general standard precautionary measures against occupational diseases is very high. However, if based on the types of disease transmission, the result is low for direct transmission, very high for airborne transmission and high for vehicular transmission. The review, modification and strengthening of University policies in relation to clinical instruction among BSN Students should be carried out by the institution.

Essentials of Scientific Writing Joseph Mugah, 2016-12-13 Essentials of Scientific Writing How to Write Effective Titles and Abstracts for Research Papers and Proposals is a belated entrant into a vast and crucially important area with scarce reference materials This scarcity manifested itself as I searched what I had expected would be useful source materials for the present book I skimmed through many textbooks on scientific writing and editing articles on the Internet and notes from courses on scientific writing They all turned out to be manifestly wanting in both depth and scope None extended beyond two pages and most were hardly a page long so they were largely useless for my purposes To the authors knowledge few published books treat the subjects of Titles and Abstracts in the kind of detail presented in this book Accordingly in developing the book the author hoped to fill a void in the crucial area of facilitating sharing of knowledge and information from research work It is my hope that everyone writing scientific work will endeavor to find space for the book on their shelves and will place it within arms length whenever they are writing or editing the title or abstract
