Coach Education in Football Thomas Leeder, 2022-06-09 Association Football is undoubtedly a global sport with millions of individuals participating in more than 200 countries. The need for an educated football coaching workforce to deliver appropriate coaching practices has never been greater. Formal coach education which is often the primary medium for developing football coaches is socially constructed meaning an array of social, cultural and historical factors underpin the design and delivery of any provision. Coach Education in Football: Contemporary Issues and Global Perspectives is the first book to explicitly explore these aspects by providing critical insight into football coach education programmes from across the globe. Each chapter organised via a central theme highlights a contemporary issue affecting football coach education and development within a specific country offering insights into the contextual opportunities and challenges. The book covers essential topics including the progression of female football coaches, coaches' perspectives towards current provision, technological and pedagogical advances and the historical development of formal coach education. Each chapter demonstrates the complexities associated with developing football coaches within grassroots and high performance domains while providing recommendations for national governing bodies, policy makers and coach developers. This book is the first of its kind to explicitly investigate football coach education globally. This accessible book is an important read for students, academics and practitioners with an interest in sports coaching, coach education and football.

Sport coaches play an increasingly important role in delivering positive outcomes through sport for individuals.

groups and societies at large It is understandable therefore that attention is increasingly being directed towards how coaches are supported in their roles Perhaps the most dominant support mechanism is large scale coach education programmes These professional development opportunities invite coaches to participate in a learning experience which typically involves exposure to new ideas opportunities to practice and an assessment Much has been said and written about the extent to which these programmes are effective and the degree to which they contribute to coach learning or not These discussions typically reference the learning environment nature of the curriculum and report coaches experiences However lacking in these discussions is any deliberation over coach assessment as a consistent feature of nearly all of these programmes the world over This book reflects a very deliberate attempt to platform and promote the issue of coach assessment This book is designed to offer support and guidance to sport coaches who are engaged in assessment coach educators developers who are delivering assessment activities and programme designers policy architects who are creating learning opportunities for coaches
