The High School Teacher, 1925      **Is Reality Optional?** Thomas Sowell, 2020-06-19 Sowell challenges all the assumptions of contemporary liberalism on issues ranging from the economy to race to education in this collection of controversial essays and captures his thoughts on politics race and common sense with a section at the end for thought provoking quotes      *Human Intelligence and Medical Illness* R. Grant Steen, 2009-09-16 As critics will note psychometric tests are deeply flawed Person to person differences in performance on a psychometric test are not informative about many things of great interest An intelligence quotient IQ cannot characterize creativity or wisdom or artistic ability or other forms of specialized knowledge An IQ test is simply an effort to assess an aptitude for success in the modern world and individual scores do a mediocre job of predicting individual successes In the early days of psychology tests of intelligence were cobbled together with little thought as to validity instead the socially powerful sought to validate their power and the prominent to rationalize their success In recent years we have obliterated many of the objections to IQ that were so forcefully noted by Stephen Jay Gould in *The Mismeasure of Man* Nevertheless IQ tests are still flawed and those flaws are hereby acknowledged in principle Yet in the analysis that follows individual IQ test scores are not used rather average IQ scores are employed In many cases though not all an average IQ is calculated from a truly enormous sample of people The most common circumstance for such large scale IQ testing is an effort to systematically sample all men of a certain age to assess their suitability for service in the military Yet it is useful and prudent to retain some degree of skepticism about the ability of IQ tests to measure individual aptitudes      **Successful Failure** Herve Varenne, 2018-03-08 In this controversial work Herv Varenne and Ray McDermott explore education as cultural phenomena construct of artifice and reality we impose upon ourselves Questioning how the American education system defines and measures success and failure *Successful Failure* is a must read for anyone interested in educational reform the American educational system and the anthropology of education In this controversial work Herv Varenne and Ray McDermott explore education as cultural phenomena construct of artifice and reality we impose upon ourselves The authors discuss in five case studies how the American education system defines and measures success and failure why there is polarization between suburban schools and urban schools and what about our system leads us to focus on the negative Their exploration focuses not on the people or the activities of the system but on the institutions themselves who decided what was a success or failure How was the identification done and with what consequences This important and timely book is a must read for anyone interested in educational reform the American educational system and the anthropology of education      **Managing IT Skills Portfolios** Makoto Nakayama, Norma Sutcliffe, 2005-01-01 Managing for IT skills is never easy at the firm level Technologies change constantly and rapidly The supply and demand of IT skills fluctuate Firms do not have commonly recognized frameworks to manage IT skills of their workforce A consistent taxonomy of IT skills is underdeveloped and used infrequently in industry *Managing IT Skills*
