Engineering Informatics Benny Raphael, Ian F. C. Smith, 2013-05-29 Computers are ubiquitous throughout all life cycle stages of engineering from conceptual design to manufacturing maintenance repair and replacement. It is essential for all engineers to be aware of the knowledge behind computer based tools and techniques they are likely to encounter. The computational technology which allows engineers to carry out design modelling visualisation manufacturing construction and management of products and infrastructure is known as Computer Aided Engineering CAE. Engineering Informatics Fundamentals of Computer Aided Engineering 2nd Edition provides the foundation knowledge of computing that is essential for all engineers. This knowledge is independent of hardware and software characteristics and thus it is expected to remain valid throughout an engineering career. This Second Edition is enhanced with treatment of new areas such as network science and the computational complexity of distributed systems. Key features: Provides extensive coverage of almost all aspects of Computer Aided Engineering outlining general concepts such as fundamental logic definition of engineering tasks and computational complexity. Every chapter revised and expanded following more than ten years of experience teaching courses on the basis of the first edition. Covers numerous representation frameworks and reasoning strategies. Considers the benefits of increased computational power parallel computing and cloud computing. Offers many practical engineering examples and exercises with lecture notes available for many of the topics. Chapters from the ASCE Technical Council on Computing and Information Technology Global Centre of Excellence in Computing www.asceglobalcenter.org providing a valuable resource for lecturers. Accompanied by a website hosting updates and solutions. Engineering Informatics Fundamentals of Computer Aided Engineering 2nd Edition provides essential knowledge on computing theory in engineering contexts for students researchers and practising engineers.

Integrated Management of Technical Documentation Jirka Hoppe, 2012-12-06 Writing documentation is an integral part of any technical product development A significant amount of time is spent describing the product functionality giving insights into technical details providing maintenance instructions specifying marketing information writing user manuals etc As the creation of such documentation is generally a source of higher production costs many large companies are realising the need to increase the efficiency of documentation handling Simple documents consisting of only a few pages can be

developed on simple systems Basic components of such systems are an editor handling text and graphics file storage and a printer Such configurations however are not sufficient to handle professional documentation as produced by larger companies Detailed studies of technical documentation requirements have revealed that in particular the following functionality is not usually provided by such simple documentation systems Technical documentation is often very large documents having hundreds or even thousands of pages are not exceptional Due to size and complexity technical documentation is developed most often by a team of authors A system for technical documentation has to provide functionality supporting the organisation of a group of authors Technical documentation usually consists of many different documents combined into one large documentation for a particular product The optimum organisation of the storage and retrieval of documents is crucial for the performance and acceptability of the system The functionality offered by normal file systems is not adequate to organise complex systems
