## •Running Finale 2003

### Installing Finale 2003 on WindowsNT/2000/XP

If any previous version of Finale has been installed on the machine, Finale 2003 recommends that you restart your computer and log on as System Administrator before installing on WindowsNT/2000/XP systems. This will prevent erroneous font warnings.

We recommend that you install Finale, and any other software, when logged in as System Administrator.

We recommend that you turn off any programs running in the background, as virus detectors can often prevent Finale from installing necessary files and updating the registry. Rest assured, your Finale CD does not contain any viruses. To turn off all programs running in the background, Press Ctrl-Alt-Delete once to bring up the Close Program dialog box. (In Windows NT, 2000, or XP, press Ctrl-Alt-Delete, then click on Task Manager.) This lists every process that is running on the system. Explorer and Systray are always running, so leave them alone. If you see anything other than those two, click on any one of the others and click End Task. When that goes away, press Ctrl-Alt-Delete again and End Task on another one in the list. (If a program remains on the list after you have tried to End Task on it, click on it, click and hold on End Task for 10 seconds, then release it. If a "This program is not responding..." message appears, click End Task in it). Repeat the process until only Explorer and Systray are left. Some computers may have some other "required" programs - if Ending Task on a program crashes the computer, try again without Ending Task on that program.
